Legistar Version 4.0 New Features

The new version 4.0 of Legistar is now available and will run under Windows 95 and Windows NT Workstation. Some of the exciting new features and functions are listed below.

Enhancements in Legistar Version 4.0:

1. True 32-bit program written in Microsoft Visual Basic 5.0
2. Site licensing for unlimited number of users.
3. Enhanced, user-friendly Legistar screens allow for easier data entry.
4. Ability to import legislative files in native word-processing formats (ASCII or RTF).
5. Legistar will now export all reports in HTML format for use on your City or County Home Page. In addition Legistar can produce reports in a variety of other formats, including:
 - character-separated
 - comma-separated
 - Data Interchange
 - Excel
 - Lotus 1-2-3
 - ODBC
 - paginated text
 - record style
 - Rich Text Format
 - tab-separated text
 - tab-separated value
 - ASCII text
 - Microsoft Word
 - Microsoft Exchange
 - Lotus Notes
 - Microsoft Mail
6. Ability to do text search of note and comment fields in history lines.
7. Unlimited size of text files and attachments.
8. Availability of Crystal Reports source code for Legistar reports.
9. Support for simultaneous multilingual use of Legistar on the same network.
10. Over 1300 user-defined system captions, labels, and messages.
11. Support for simultaneous referrals to different committees, boards, or commissions.
12. Automatic generation of user-defined tracking numbers and enactment numbers.
13. Ability to use digital images and signatures for all staff and elected officials.
14. Year 2000 compliant with graphic calendaring.
15. Ability to change the grid layout of display information.
16. Enhanced Minutes allows for multiple roll calls and simplified consent process.
17. By one click you can move between Legislative Files and their corresponding Agenda and Minutes.
18. System can be integrated with ConTrack® from Daystar Computer Systems, Inc.
19. Ability to edit database information on the fly.
20. And many other new and useful features.
