Appendix A Comprehensive Plan GOPs

Exhibit A-1

Future Land Use Element

Goal 2 Redevelop areas within the city, as needed, in a manner that promotes quality of life, transportation choice, a healthy economy, and discourages sprawl.

Objective 2.1 Redevelopment should be encouraged to promote compact, vibrant urbanism, improve the condition of blighted areas, discourage urban sprawl, and foster compact development patterns that promote transportation choice.

Policy 2.2.2 The City shall review the comprehensive plan and the land development code on a bi-annual basis with respect to the appropriate development of the Gainesville Innovation Zone. Should such review conclude that any amendments to the comprehensive plan or land development code pertaining to the Gainesville Innovation Zone are needed, the City shall draft such amendments and present them to the City Plan Board.

Policy 4.1.1 - Land Use Categories on the Future Land Use Map shall be defined as follows:

Mixed-Use High-Intensity (up to 150 units per acre)

This category allows a mixture of residential, office, business uses and light industrial uses concentrated in mapped areas. This category shall also allow traditional neighborhoods on sites 16 acres or larger in conformance with the adopted Traditional Neighborhood Development (TND) ordinance. Public and private schools, institutions of higher learning, places of religious assembly and community facilities shall be appropriate in this category. Such development shall function as a center serving the urban area. When in accord with all other land use regulations, residential densities up to 150 units per acre shall be permitted. Land development regulations shall be prepared to ensure the compact, pedestrian character of these areas. Land development regulations shall establish the thresholds for the percentage of mixed uses for new development or redevelopment of sites 4 acres or larger. At a minimum, the land development regulations shall encourage that: at least 10 percent of the floor area of new development or redevelopment of such sites be residential. Residential use shall not be a required development component for public and private schools, institutions of higher learning, places of religious assembly and community facilities. Buildings in this category shall face the street and have modest (or no) front setbacks. Floor area ratios in this district shall not exceed 10.00.

Policy 4.2.1 The City shall adopt land development regulations that provide protection for adjacent residential areas and low intensity uses from the impacts of high intensity uses by separating intense uses from low-intensity uses by transitional uses and by performance measures. Performance measures shall address the buffering of adjacent uses by landscape, building type and site design. Regulation of building

type shall insure compatibility of building scale, and overall building appearance in selected areas. Regulation of site design shall address orientation. Such regulation shall also include arrangement of functions within a site, such as parking, loading, waste disposal, access points, outdoor uses and mechanical equipment; and the preservation of site characteristics such as topography, natural features and tree canopy.
