Recycling Processing

- Alachua County was assigned the City's contract with S&P Recycling for processing recycling in 2015. This contract expires September 30, 2016.
- Alachua County has proposed a blended rate and potential revenue share which provides for Alachua County to absorb increased operating cost associated with the County's \$12 Living Wage Ordinance that goes into effect October 1, 2016.

- **Interlocal Agreement with Alachua County for Solid Waste Services**
 - **Expires December 2018**
- **Interlocal Agreement between Alachua County and New River for Solid Waste Disposal**
 - **Expires December 2018**

Solid Waste Disposal

Tipping Fee

* Transfer Station opened in Fiscal Year 1999

Option A

- Initiate contract negotiations with Alachua County to extend the Interlocal Agreement beyond 2018.
 - Considerations:
 - City has ability to influence the disposal option chosen by Alachua County.
 - City is provided assurances for a maximum tipping fee for the duration of the agreement

Option B

- Approve an Interlocal Agreement with Alachua County for processing recyclables for a term to expire in 2018 to coincide with the existing Interlocal Agreement with Alachua County for waste disposal.

Option C

- Establish one or more exclusive commercial franchises to control all waste in the City and protect the City's ability to negotiate processing and disposal services in the future.

Option D

- Hire a consultant to identify and evaluate the City's options of managing the collection and disposal of solid waste and recycling services.

Staff Recommendation

- That the City obtain the services of a solid waste consultant to assist in evaluating the cost/benefit of solid waste management options.
