

Public Comments – SE 4th Street Public Meeting – June 4, 2014 5-7 pm

Email/Name/Address	Comments
Everyman84@att.net Peter Theakteste 944 SE 4 th Street	Option 4 I like option 4 but the drop off on one side of the bike path and the curb on the other side bothers me. How about 2 10' multipurpose sidewalks and no designated bike path?
O. Washington Reeves & Washington families 1943 SW 73 rd Street Gainesville, FL 32607	Option 1 Please include construction improvements for Sweetwater Branch; curbs, gutters, two stormwater retention ponds, etc. Thanks.
franklinia@gmail.com Anne Barkdoll 3931 SE 41 Ave	None of these designs are suitable for the residential area. They are too wide & no trees. Truck traffic south of the creek needs to be eliminated. Option 7 is the least offensive but, is completely unsuitable. All utilities need to be placed underground.
megnolia@aol.com Meg Niederhofer 2619 SE 30 th Place	None of these options deliver a decent entrance to the city center from SE Gainesville. Please come up with an option that includes trees rather than a huge swath of hardscape. I'd like to see you preserve the Heritage Live Oaks & only have bike lane & sidewalk on the other side. If you have to destroy the trees, perhaps you could use the code-required mitigation funds for destroying Heritage trees of high quality species for tree wells. It looks like Option #6 10' shared use path could have tree wells.
BOYDSL@ gmail.com Sherri Boyd Amundson 1830 SE 32 nd Place	No option chosen. Add or keep trees. Multi-use on one side. Bike paths definitely. Keep it as narrow as possible to not have a huge swath of cement. I bike, walk & drive this road – 25 years.
CC Helen Warren	As a commissioner I am here to hear public comment and discussion.
