Exhibit A-3: Comprehensive Plan Policies

Future Land Use Element:

Policy 4.1.1 Land Use Categories on the Future Land Use Map shall be defined as follows:

Mixed-Use Low-Intensity (8-30 units per acre)

This category allows a mixture of residential and non-residential uses such as standard lot single-family houses, small-lot single-family houses, duplex houses, townhouses (attached housing), accessory dwelling units, group homes, multi-family housing (if compatible in scale and character with other dwellings in the proposed neighborhood), offices scaled to serve the surrounding neighborhood, retail scaled to serve the surrounding neighborhood, public and private schools, places of religious assembly and other community civic uses, and traditional neighborhoods on sites 16 acres or larger in conformance with the adopted Traditional Neighborhood Development (TND) ordinance. Intensity will be controlled, in part, by adopting land development regulations that establish height limits of 5 stories or less; however, height may be increased to a maximum of 8 stories by special use permit. Land development regulations shall establish the thresholds for the percentage of mixed uses for new development or redevelopment of sites 10 acres or larger. At a minimum, the land development regulations shall encourage that: at least 10 percent of the floor area of new development or redevelopment of such sites be residential; or, that the surrounding area of equal or greater size than the development or redevelopment site, and within 1/4 mile of the site, have a residential density of at least 6 units per acre. Residential use shall not be a required development component for public and private schools, institutions of higher learning, places of religious assembly and other community civic uses. Buildings in this category shall face the street and have modest (or no) front setbacks.

This category shall not be used to extend strip commercial development along a street. Land development regulations shall ensure a compact, pedestrian-friendly environment for these areas, and provide guidelines or standards for the compatibility of permitted uses.
