

Honorable Larry Cretul, Representative District 22
Alachua County Legislative Delegation

Dear Representative Cretul

City of Gainesville supports the CBIR funding requested by New River Solid Waste Association. We agree that the Bio-Reactor project is worthy of continued funding by the legislature. Continued use of the Bio-Reactor demonstration project will allow the association to save precious landfill space, have a positive environmental impact and the information obtained will benefit other communities through out the state in managing their solid waste.

City of Gainesville legislative liaison staff will be prepared to support this CBIR request during the up coming Legislative session.

Sincerely,

Pegeen Hanrahan, Mayor
City of Gainesville
