To: ACBR,
FROM: W. Willard,
Subject, Minority Report:

While the Minority report are not something Builders, LLC Inc, or Developers want to here, and have their remarks resembled at first, I personally grow to resent them, especially when they keep interrupting, with to the point.

Assuming their will be a savings from reduced expenditures or budget cuts, because the County Managers asked Staff to cut back in Fiscal 2003, before 2004 and 2005 15% was 50% of Ad Valorem, before taxes, now it's after taxes, and the dollar realized was the one that was reconed with before fuel costs exceeded \$1.86 or .96 cents nationally, and the Ones that wasn't realized before fuel costs exceeded \$1.96 per gallon, there would be no realization after Transportation costs fell again.

To the point, nothing before the spike, equals nothing after deflation. coupled with State Coffers, FEMA fraud and collection controlls, resulting in some 8000 calls to the Attorney General's Office for price gouging.

GRU or General Government measley 8 or 9 million dollars reserve Hurricane relief, compared to FPL 762, 354 million of which they hope to recoup from it's co-existing customers instead of the nonexistent customers they would have gotten from a 4 way coop with GRU, putting more SOH's on the market not to satisfy the tax roll, but a nonexistent tax bill, the taxation Chief in WASHINGTON, D.C, informed George W. Bush was DOA. **THOMAS**

And January 18, 05 ACBR Committee Authority report of the last motion, the last minutes, of the last meeting, in which Mr. Drapski saw no need for waste, duplication, or redundancy reduction; while Mr. Wershow's motion for an intercessory tax and consideration for existing infrastructures was moved to a second and passed, but not without reconsideration of the intercessory on Impact Fees, for new or coexisting infrastructures substitute or amendment, which I substituted, and with diligence now I ask Mr. Wershow to consent to an Amendment or substitution.

As for my Family in Gainesville 19 to 17 years old' or 9.9 Generation they can rest assured, If DH3 is implemented in Gainesville Florida's proximity to DH2, and the conduction of Solid Fuel by-products into the Aquifer, it will be as a result of maximum use of Solid Fuel utilization or conduction away from our Aquifer below the intermediate Aquifer. As the abundance of 16 and 23 Avenues almost did to our Aquifer. #r

The particulate matter or PM(2.5) studies won't matter after PM (1.5) is exceeded, the rest is gravy or free. Everyday we see examples of the laws of Physics being virtually denied or defied but never violated without an immovable object becoming an irresistible force or Vice Versa.

This is not the case of missing evidence, but the evidence of things unseen this is the case of things that cease changing, when their bucks stop in Gainesville at 316 and 288, not 222 or at 333.

And the poor that can't afford fertile minds running rampant over Gainesville! babbling Bama can't afford to overcome what Dr. King did once. The only thing we can't afford is digging up fertile minds out of the sandy loam and soil of Gainesville, before the can not's and have not's have overcome to advance by any any means necessary by betterment of any Business Bureau necessary. }

And the Souls resting in the Malarka Straights' of Ceylon, Banda Ache, San matra and Sri Lanka Hills," "Bhagavad Gita."

Along with Developers/Contrators reconstruction, Collectors, and end of Developement fees towards" new Infrastructures, and paving or resurfacing come from existing Infrastructures "fee,'while this Committee is not the Authority to impose Collections on Impact Fees, but the millage rates,for the Abominations of abandoned or vaccant property around Gainesville, which passes for existing Infrastrutures, and Special Areas that passes for the UoF by rights,An Institution whose building masses 5 stories or less exceeds more than 50% of the lots allotment in Gainesville, than Private property rolls, IF the University would save some for Disney World, We will have a Fairground and Weseman sight in the SW and mid NW Gainesville, opposite WAL-MART and the University avoid hardships upon potential Homeownership Exemption of Homesteads, and Non Ad Valorem alike.

This is in line with the Governor's plan based on the elimination of real property and intangible tax over a period of time, and 2 year's of per capita income tax and consumption use instead of PILOT or Deference.
