

Appendix A Comprehensive Plan GOPs

Exhibit A-1 Comprehensive Plan GOPs

Future Land Use Element

Objective 1.5 Discourage the proliferation of urban sprawl.

Policy 4.1.1 Land Use Categories on the Future Land Use Map shall be defined as follows:

Single-Family (up to 8 units per acre)

This land use category shall allow single-family detached dwellings at densities up to 8 dwelling units per acre. The Single-Family land use classification identifies those areas within the City that, due to topography, soil conditions, surrounding land uses and development patterns, are appropriate for single-family development. Land development regulations shall determine the performance measures and gradations of density. Land development regulations shall specify criteria for the siting of low-intensity residential facilities to accommodate special need populations and appropriate community-level institutional facilities such as places of religious assembly, public and private schools other than institutions of higher learning, and libraries. Land development regulations shall allow home occupations in conjunction with single-family dwellings under certain limitations.

Policy 4.2.1 The City shall adopt land development regulations that provide protection for adjacent residential areas and low intensity uses from the impacts of high intensity uses by separating intense uses from low-intensity uses by transitional uses and by performance measures. Performance measures shall address the buffering of adjacent uses by landscape, building type and site design. Regulation of building type shall insure compatibility of building scale, and overall building appearance in selected areas. Regulation of site design shall address orientation. Such regulation shall also include arrangement of functions within a site, such as parking, loading, waste disposal, access points, outdoor uses and mechanical equipment; and the preservation of site characteristics such as topography, natural features and tree canopy.
