

Appendix A

Applicable Goals, Objectives, and Policies of the Comprehensive Plan

Future Land Use Element

Goal 2 Redevelop areas within the city, as needed, in a manner that promotes quality of life, transportation choice, a healthy economy, and discourages sprawl.

Objective 2.1 Redevelopment should be encouraged to promote compact, vibrant urbanism, improve the condition of blighted areas, discourage urban sprawl, and foster compact development patterns that promote transportation choice.

Policy 2.1.5 The City shall strive to implement certain land use-related elements of Plan East Gainesville, including but not limited to:

- a. Establishing a three-tiered land use transect for east Gainesville to transition land development regulations from urban to suburban to rural;
- b. Coordinating with Alachua County in its development of a strategy for the Alachua County fairgrounds for creation of a mixed-use employment center; and
- c. Coordinating with Alachua County and the Tourist Development Council to evaluate the site east of Fred Cone Park as a potential cultural or recreational center to be compatible with the existing uses at Cone Park.

Objective 4.1 The City shall establish land use designations that allow sufficient acreage for residential, commercial, mixed use, office, professional uses and industrial uses at appropriate locations to meet the needs of the projected population and which allow flexibility for the City to consider unique, innovative, and carefully construed proposals that are in keeping with the surrounding character and environmental conditions of specific sites.

Policy 4.1.1 Land Use Categories on the Future Land Use Map shall be defined as follows:

Business Industrial

This land use category is primarily intended to identify those areas near the Gainesville Regional Airport appropriate for office, business, commercial and industrial uses. This district is distinguished from other industrial and commercial districts in that it is designed specifically to allow only uses that are compatible with the airport. Intensity will be controlled by adopting land development regulations that establish height limits consistent with the Airport Hazard Zoning Regulations. When not located within an airport zone of influence, this category may be used to designate areas for office, business, commercial and industrial uses, with a maximum height of 5 stories, and a maximum floor area ratio of 4.0. Land development regulation(s) shall specify the type and distribution of uses, design criteria, landscaping, pedestrian and vehicular access.

Conservation

This category identifies areas environmentally unsuited to urban development, permanent buffers between land uses, areas used for passive recreation and nature parks. Privately held properties within this category shall be allowed to develop at single-family densities of 1 unit per 5 acres. Land development regulations shall determine the appropriate scale of activities, structures and infrastructure that will be allowed.
