ACL GRC

A flexible and easy way to manage the process of assessing risk, planning and organizing projects

"We realized a 25% increase in audit management efficiency. In the two years we've been using ACL GRC, our audit revenues went up by 5% without increasing staffing. Our auditors work less than they did in the past while producing more work."

— Lisa Traina, Traina & Associates

Simplify your Audit, Risk, and Compliance Projects

How do you organize your work? If you relate to the majority of other audit, risk, and compliance teams, your daily reality involves spending too much time in building spreadsheets and working in silos. You lose a lot of time spent on documenting and reviewing, instead of helping your organization meet its objectives while managing risks and doing your best to collaborate across your teams.

Introducing ACL GRC: Governance, Risk and Compliance Simplified

As a client who started with ACL Analytics and integrated ACL GRC to their solution, the team at Self Regional are starting to see the benefits of "data-driven GRC." Watch why ACL GRC was the right fit for them.

Anna Cuson, Senior Internal Auditor, Self Regional Healthcare

There is a solution. Audit, risk and compliance management doesn't have to be complex or spreadsheet-intensive. With you in mind, we designed ACL™ GRC— a flexible and easy way to manage the process of assessing risk, planning and organizing projects, analyzing data, communicating issues, and visually sharing your findings. Since ACL GRC is delivered in the cloud, it's accessible from anywhere, secure, and doesn't require any ongoing IT support.

Whether your team consists of 3 or 3000, ACL GRC helps you:

- **Improve productivity** by achieving an average increase of 25% in audit efficiency with automated workflows
- **Deliver higher ROI** by providing organizational value-add services while spending less time documenting and reviewing
- **Enable faster decision making** by providing visibility into information with smart dashboards and reporting tools and sharing it across other departments and stakeholders
- **Collaborate and work from anywhere** since your client audit data is accessible in the cloud and available to your team members 24×7
- **Achieve low Total Cost of Ownership** by eliminating the heavy up-front technology costs that other on-premise or complex systems impose. ACL GRC is cost effective over traditional manual processes and requires no IT set up time or maintenance headaches – your system is automatically upgraded

Gain Insights into Strategic Risks

ACL GRC helps executives and risk managers track, assess, prioritize, and communicate strategic risks across the leadership team. It provides a straight-forward way to capture and maintain a complete view of risks across the enterprise; track the risks that are most important and plan audit and risk mitigation projects for the greatest impact.

Save Time and Unlock Productivity

Manual processes, using products such as Microsoft Office® or Share drives used for audit work, tend to be document and administration heavy. Gain valuable time with ACL GRC by empowering your teams to manage audits, compliance initiatives, enterprise risk and control assessments in one central place, ensuring consistency across all teams.
