

PUBLIC RECORDS ACT REQUEST

From Gabriel Hillel, gabrielhillel@gmail.com, (352) 375-2670, 4411 S.W. 34th St., #1305, Gainesville, FL 32608.

Aside from an e-mail from Patricia Williams about two of my three public records act requests I submitted at the last City Commission meeting on Dec. 1, 2011, I have gotten no response to them. To satisfy one of the two, to which she responded, I have asked for a copy from the City Attorney of a document to identify the law firm outside of Gainesville he retained to represent the City. To satisfy the other, I asked for documents related to the appointment and any renewal of that appointment by the Gainesville City Commission of City Attorney Marion Radson.

This is a new request. This request is intended to include any document, recorded in writing or orally, including but not limited to print, audio, video, computer transmissions, I-phone texts, billing records, invoices and any other document which is not specifically exempt from disclosure by law, about the following:

1. The Agenda, including a Supplemental Agenda, for the City Commission meeting of Oct. 7, 1985, as well as the minutes thereof. Such documents should contain information about the designation of Marion Radson as City Attorney.
2. All communication between Marion Radson and the Gainesville Regional Airport Authority in the year 2000.
3. A proposed Request for Proposal or Request for Information or any other writing related to the improvement of the City website, which was approved by City Officials in the 2011-2012 budgets.

Thank you in advance for the consideration I trust you will give this.

SAINT VILLE

Butterfly City Requirements

1. Take political action by elected municipal officials to designate butterflies as a subject for protection and promotion.
2. Identify at least one butterfly site or event, which is intended to attract tourists, as well as area residents.
3. Involve, as appropriate, specific City departments to create and maintain butterfly and other garden habitats.
4. Foster creation and maintenance of butterfly and other forms of gardens in cooperation with public and private agencies.

6. Urge individuals, businesses, professionals, associations, organizations, fraternities, sororities, associations, garden clubs, and others to promote the community as a Butterfly City
6. Provide means to register such actions and to reward those taking them. A Butterfly City offers the certified symbol for display by private participants. A Butterfly City also will authorize distribution of the logo and education materials about Lepidoptera as appropriate
7. Work with media to let the community know about local and seasonal distribution of butterflies and other Lepidoptera and the appropriate plant life to sustain each stage of insect life

8. Increase knowledge about and enjoyment of butterflies in segments of the local population which have not been oriented to those benefits in the past. Children, especially, should be included
9. Educate people about the steps to be taken to limit harm to the Lepidoptera species when measures are used to eliminate mosquitoes and other insect pests
10. Officially approve and proclaim a Butterfly Day or Days each year
