

TO: Economic Development University/Community Committee (EDUCC)
FROM: Erik A. Bredfeldt, Planning and Development Services Director 
DATE: June 16, 2010
SUBJECT: EDUCC Meeting – June 24, 2010

At the June 24th meeting, the Committee has one proposed agenda item for discussion involving the provision of infrastructure for the purposes of facilitating economic development. This matter was referred by the City Commission to the EDUCC in March.

Attached as back-up are two papers, one provided by staff and one provided by Commissioner Poe. The papers are intended to stimulate some thoughts generally on the infrastructure topic.

The staff provided paper is a portion of a larger work produced by the Urban Land Institute regarding the provision of infrastructure from a national and global perspective. Interestingly the paper is focused on the provision of water, a topic that is one of growing concern in North Central Florida. In the event that Committee members wish to pull the entirety of the paper it is located at:

<http://www.uli.org> Click on Research and Publications to find the full report.

Commissioner Poe's submitted paper produced by the Lincoln Policy Institute provides an analysis of the New Economy and the factors important in facilitating its growth and development.

I look forward to seeing you on the 24th.
