Date: As of January 3rd, 2020: Major Energy Supply Projects/Milestones Updates:

1. Deerhaven Generating Station (DH):

- a. Major Maintenance Group will begin the planned Process Plant outage on 1/6/2020, and this outage is tentatively scheduled to run through 2/10/2020.
- b. For Deerhaven Unit #2 (DH2) we have completed our trials of adding Carbon XT to coal to address mercury concerns, and the Environmental Group is submitting final report to get long term permit permission that will allow full use of this additive for mercury control of coal.
- c. For DH2 we are conducting a due diligence study on the work scope and cost to convert DH2 to either dual fuel or 100% natural gas.

2. Kelly Generating Station (JRK):

- a. During the planned borescope outage for Kelly Plant CT4 the contractor discovered a cracked transition piece between exhaust and turbine inlet on 12/20/2019. Unit was made available emergency use only while we developed the outage resource plan to replace this damaged transition piece. Due to holiday the earliest we could get GE to respond was on 12/30/2019. GE arrived and worked this repairs under 12 hour day schedule and tentatively we are now scheduled to test run the unit post repairs on Saturday (1/4/2020). Following a successful test run we will be required to have GE complete cold weather tuning before we can fully release CT4, and then allow Kelly Plant to go back to combined cycle. Cold Weather tuning is being coordinated for Monday 1/6/2020.

3. Deerhaven Renewable(DHR):

- a. On 12/18/2019 the plant experienced wood fuel smoldering in the hogger building that carried over the dust suppression system. This incident required Alachua Fire Department to respond to address this potential fire issue. Prompt response by AF minimized damage to several bag in the dust suppression baghouse. Investigation revealed the source of the smoldering was a metal piece in the fuel mix that was not removed by our magnetic separator. When this metal piece entered the hopper the metal to metal contact resulted in the wood smoldering, and the water suppression system could not stop the smoldering promptly. We will be looking into options to beef up the capability of the current magnetic separator to prevent reoccurrence.

4. South Energy Center (SEC):

- a. Phase 2 Cooling Tower Fans have been experiencing excessive vibration and premature motor bearing failures. We are still working with the OEM (Grey Associates) to replace the motor and fans under warranty. We have new motors on order from Baltimore Aircoil Company (BAC), and working on scheduling with WW- Gay to move fan overhead piping and install these new motors. In parallel we are working with the SEC Engineering Group (Burns & McDonnell) to fully recover this cost.

5. Other:

- a. The Solar Intent to Negotiate (ITN) is still in the negotiation process with 3 vendors, with update expected to be presented to UAB/CCOM in January 2020.

Mercury and Particulate values are for Unit 2 only.

DHR data included starting in 2018.

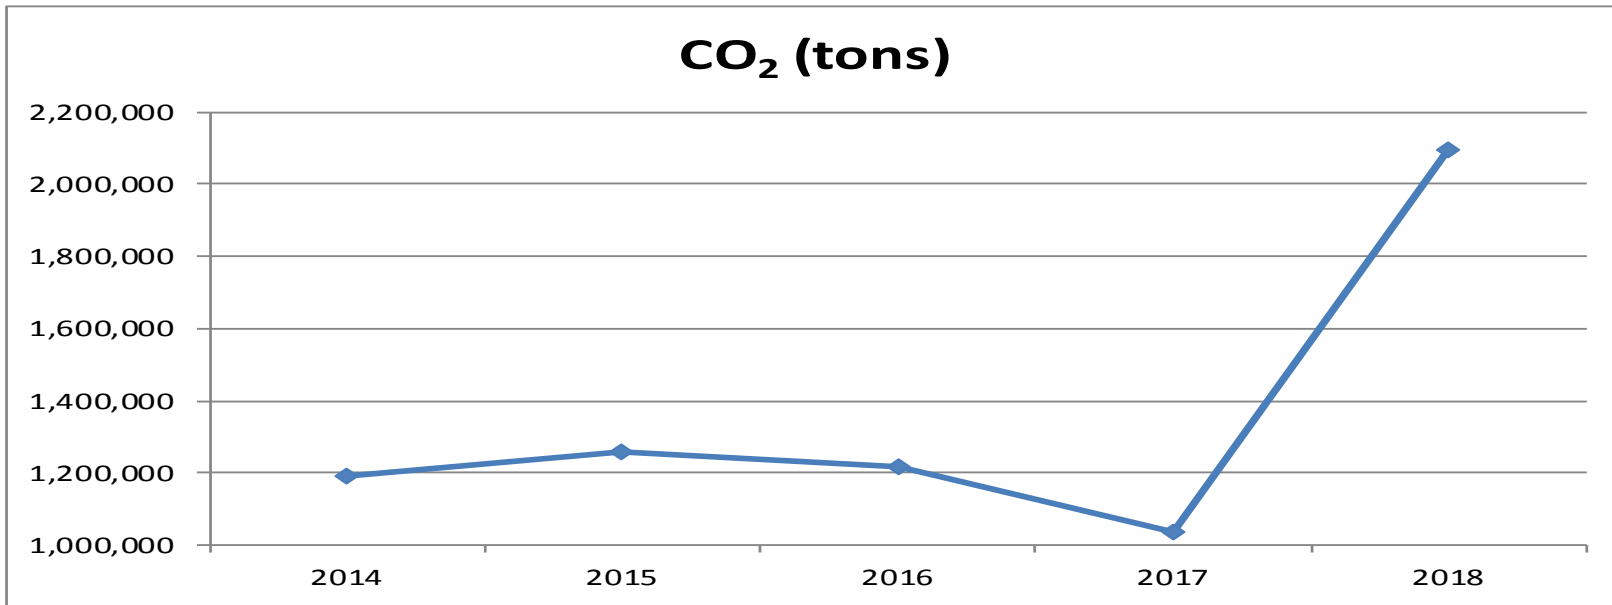

SO₂ was lower in 2015/2016/2017 due to higher removal rate settings for compliance w/MATS Rule.

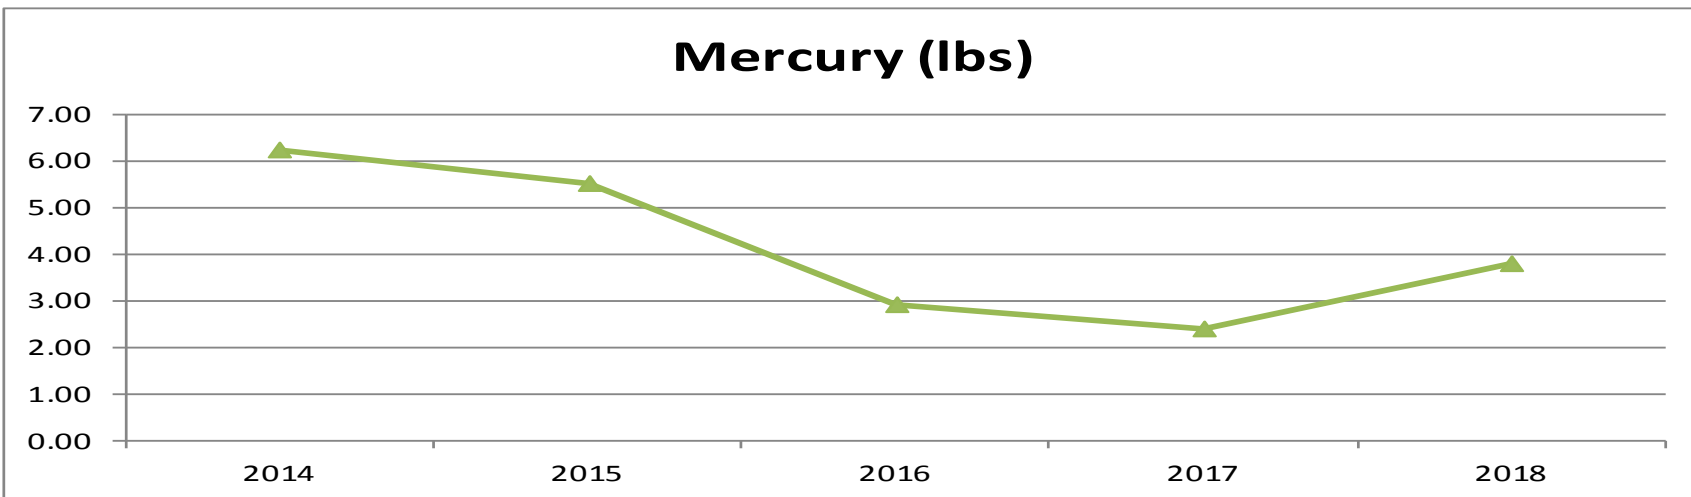

NO_x higher in 2016 as it was more cost effective to use allowances than increase SCR removal rate.

DHR data included starting in 2018.

Major Projects and Other Updates

MWTP Electric System Upgrade - Startup and cutover to new equipment by component is continuing successful and anticipated to be completed in March/April.

MSWRF Phase I Project - planning and design are underway. Progressive Design Build contract is being finalized.

Gravity Sewer Lining - Scheduling lining work for FY20 with the goal of lining 10 miles.

KWRF - headwork repairs complete and back in service

Water Distribution - repairing leaks more rapidly and maintaining leaks holding to under 25 on a monthly average.
