

Appendix A Comprehensive Plan GOPs

Exhibit A-1 Comprehensive Plan GOPs

Conservation, Open Space & Groundwater Recharge Element

Objective 2.4 The City shall amend its land development regulations as necessary to conserve natural systems of surface waters and wetlands; areas subject to high rates of Floridan aquifer recharge; listed species of plants and animals; significant natural communities, and other significant natural and archaeological resource areas, including strategic ecosystems and significant geological resource features; and minimize the spread of invasive vegetation. The adopted regulations shall be designed to maintain these characteristics and resources, and the functions and values which they provide, and allow development activities which are compatible with the conservation of these resource areas as identified in the Comprehensive Plan or by provisions of the Land Development Code.

Policy 2.4.2 The City shall maintain land development regulations that protect listed species of plants and animals, significant natural communities, significant geological resource features, and strategic ecosystems as based on areas identified and described in the KBN/Golder Associates Report, "Alachua County Ecological Inventory Project" (1996). These regulations shall require that applications for development on parcels within the environmentally significant areas shall include an ecological inventory of the parcel that meets requirements specified in the Land Development Code.

Policy 2.4.6 The City shall maintain land development regulations for regulated surface waters and wetlands that require:

- a. Buffers and/or setbacks from regulated surface waters and wetlands;
- b. Development to minimize erosion and sediment pollution to regulated surface waters and wetlands;
- c. No net increase in the rate of runoff from development sites adjacent to regulated surface waters and wetlands;
- d. Retention or detention of runoff from developments adjacent to regulated surface waters and wetlands, through on-site filtration in accordance with the Public Works Design Manual;
- e. Retention of vegetation integral to the ecological value of regulated surface waters and wetlands;
- f. Compliance with the City's adopted criteria for controlling sediment and erosion;
- g. Allowance of a transfer of development intensity and density from lower to higher elevations of a site; and

- h. Prohibition on the installation of all septic tanks.

Policy 2.4.10

The City's land development regulations shall protect environmentally significant lands and resources by:

- a. Providing opportunities for alternative and innovative site development;
- b. Providing setback and parking standards;
- c. Providing mandatory mitigation to ensure no net loss of functions and values when wetlands are unavoidably lost;
- d. Allowing for, or requiring the clustering of development away from environmentally significant resources;
- e. Restricting on-site waste disposal systems; and,
- f. Allowing transfer of land use density and/or intensity to retain development potential from set-aside areas that are required to meet the goals, policies, and regulations of this element and the Land Development Code.

Future Land Use Element

Policy 2.1.4

The City shall strive to implement certain land use-related elements of Plan East Gainesville, including but not limited to:

- a. Establishing a three-tiered land use transect for east Gainesville to transition land development regulations from urban to suburban to rural; and
- b. Coordinating with Alachua County in its strategy to develop the Alachua County fairgrounds as a mixed-use employment center.

GOAL 3

ACHIEVE THE HIGHEST LONG-TERM QUALITY OF LIFE FOR ALL GAINESVILLE RESIDENTS CONSISTENT WITH SOUND SOCIAL, ECONOMIC, AND ENVIRONMENTAL PRINCIPLES THROUGH LAND DEVELOPMENT PRACTICES THAT MINIMIZE DETRIMENTAL IMPACTS TO THE LAND, NATURAL RESOURCES, AND URBAN INFRASTRUCTURE.

Objective 3.1

The City shall protect environmentally sensitive land, conserve natural resources, and maintain open spaces identified in the Future Land Use Map Series through the Development Review Process and land acquisition programs.

Policy 3.1.1

Standards and guidelines established in Conservation, Open Space, and Groundwater Recharge Element Objective 1.1 and its Policies shall be used to protect identified environmentally sensitive resources.

Intergovernmental Coordination Element

- Policy 1.2.1** The City shall proceed with annexation according to the criteria of the Alachua County Boundary Adjustment Act. Urban areas within its Urban Reserve Area that meet the criteria of “urban in character” as outlined in the Boundary Adjustment Act are subject to annexation by the City.
- Policy 1.2.2** The City shall collaborate with Alachua County to develop the required urban services report that will address the fiscal issues related to urban services for residents in the Urban Reserve Area, including minimizing the time that one jurisdiction is providing services to an area for which it is not receiving revenue.
- Policy 1.4.7** Upon the annexation of any land, the City shall amend the Comprehensive Plan to reflect data and analysis changes, establish land uses on newly annexed areas, and provide services to meet adopted LOS standards.
- Policy 1.4.8** In the interim period between annexation and the amendment of the Comprehensive Plan to include the newly annexed areas, the City shall implement Alachua County's adopted Comprehensive Plan and Land Development Regulations.

Transportation Mobility Element

- Policy 10.1.1** All property within city limits is included in the Gainesville Transportation Mobility Program Area (TMPA); however, the TMPA shall not apply to annexed properties that do not yet have an adopted City land use category. When annexed properties are designated with a City land use category, they shall be assigned to the most physically proximate TMPA zone as mapped in the Transportation Mobility Element Data and Analysis Report and in the GIS Map Library on the City's Planning and Development Services Department website.
- Policy 10.1.2** All land uses and development located in the TMPA shall meet the TMPA policies specified in this Element.
- Policy 10.1.3** Zone A shall promote redevelopment and infill in the eastern portion of the City and the area near the University of Florida. Except as shown in Policy 10.1.4 and Policy 10.1.14, funding for multi-modal transportation in Zone A shall be provided to the maximum extent feasible by the City, Community Redevelopment Agency, federal or state governments, and other outside sources such as grant funds.
- Policy 10.1.4** For any development or redevelopment within Zone A, the developer shall provide the following transportation mobility requirements. The developer shall provide any transportation modifications that are site related and required for operational or safety reasons, such as, but not limited to, new turn lanes into the development, driveway modifications, or new traffic signals, and such operational and safety modifications shall be unrelated to the Transportation Mobility Program requirements.
- a. Sidewalk connections from the development to existing and planned public sidewalk along the development frontage;
 - b. Cross-access connections/easements or joint driveways, where available and economically feasible;

- c. Deeding of land or conveyance of required easements along the property frontage to the City, as needed, for the construction of public sidewalks, bus turn-out facilities, and/or transit shelters. Such deeding or conveyance of required easements, or a portion of same, shall not be required if it would render the property unusable for development. A Transit Facility License Agreement between the property owner and the City for the placement of a bus shelter and related facilities on private property may be used in lieu of deeding of land or conveyance of easements. The License Agreement term shall be for a minimum of 10 years;
- d. Closure of existing excessive, duplicative, or unsafe curb cuts or narrowing of overly wide curb cuts at the development site, as defined in the Access Management portion of the Land Development Code; and
- e. Safe and convenient on-site pedestrian circulation, such as sidewalks and crosswalks connecting buildings and parking areas at the development site.
