Michael J. Heimbach

From: Michael J. Heimbach
Assistant Director
Counterterrorism Division
National Security Branch

To: Mr. Harold Saive
1716 NW 10 Terrace
Gainesville, FL 32609

Dear Mr. Saive:

This letter is in response to your correspondence, dated November 7, 2008, to Director Robert S. Mueller, III in which you urged the FBI to consider the work of Mr. Richard Gage, founder of Architects and Engineers for 9/11 Truth, and his supporters in the on-going federal investigation into the World Trade Center attacks. The Director's Office forwarded your letter to the Counterterrorism Division for direct response to you.

First, let me thank you for offering to provide information to the United States Government. The information the FBI receives from concerned individuals is critical to its mission of protecting the U.S. and its citizens against terrorism. As with all cases, the FBI will continue to examine the 9/11 investigation from every angle as new evidence develops, utilizing all leads available.

Mr. Gage presents an interesting theory, backed by thorough research and analysis. The case agents in charge of the investigation will undoubtedly review all relevant information before making an unbiased decision.

Please be advised that your observations and concerns have not gone unheeded.

The FBI is committed to identifying terrorist threats at home and abroad, and using the full force of the law to prosecute these individuals.

Thank you for your time and efforts regarding this matter.

Sincerely Yours,

Michael J. Heimbach
Assistant Director
Counterterrorism Division
National Security Branch

The National Priorities Project has calculated the cost of our 10 year WAR ECONOMY with Stunning implications.

FOR the CITY of GAINESVILLE, ALONE..the Cost of the WAR ECONOMY is a giant sucking sound of \$22 million dollars a year of lost jobs, homelessness and economic opportunity.

And \$22 million is two-thirds of the City's operating budget from the GRU general funds transfer. This is 22 million dollars that is leaving the City to support military actions that may not be necessary... and could be stopped with the commission's prudent support for a new investigation.

I don't believe 9/11 was an Inside Job and neither do 1,600 Architects and Engineers for 9/11 Truth.

Veterans For Peace wants an investigation because not one person has been held accountable for the National Security failures that could have prevented the wars in the 1st place.

Patriotic groups are simply asking for a re-investigation based on the rule of law and conclusive evidence for controlled demolition.

The Chief Counsel to the 9/11 Commission JOHN FARMER admits the Pentagon got away with lying to Congress about the events of 9/11 when the Commission was prevented from indicting the suspects.

The details are in his book: THE GROUND TRUTH.

When Senator Bob Graham was asked why he wrote his book -- KEYS TO THE KINGDOM -- the Senator said HE WAS "angry" at what he thought were the undisclosed secrets of 9/11."

When the DOJ fails to indict suspects for documented acts of treason, the public has earned the right to call 9/11 nothing less than a government Cover-up.

Architect, Richard Gage and Fiteen hundred building professionals (Some in Gainesville) see a threat to democracy when the Government and the Press refuse to acknowledge and report the conclusive evidence that pre-planted explosives

ultimately destroyed the Twin Towers and Building 7.

I have a personal letter from the Director of FBI's division of Counterterrorism (Michael J. Heimbach) that acknowledges Richard Gage's conclusive evidence for controlled demolition is "backed by thorough research and analysis".
What more do you need?

Mr Mayor, I challenge each member of this commission to respond to this question tonight:

Why would this Commission RISK NOT supporting an investigation if it could stop or mitigate the \$22 million dollar economic drain to our local economy. in the City of Gainesville.?
