This quarterly monitoring report format was implemented in FY 2003. The intent is to provide a more concise overview of operating results in the General Fund and the Proprietary Funds. In addition we have offered a projection of year-end results for each fund. Please keep in mind that these projections are based on second quarter activity and historical trends. As the year progresses, these projections will offer a more reliable forecast barring unexpected events in subsequent months.

Executive Summary

General Fund

The General Fund performed within budget parameters for the second quarter of the fiscal year. General Fund Sources came in at 57.9% of the budget compared to 59.1% the previous year. Although the actual revenues recognized in the second quarter increased by over 2.7 million dollars, the collections ratio declined due to an increase in the budget of close to 6.6 million dollars. Revenue categories of Taxes and Licenses and Permits are prime examples of this condition. Actual second quarter revenues increased for these revenue categories in FY 2007 but the actual to budget ratio declined due to increases in their respective budgets. Tax revenues experienced a decline in the collections ratio primarily due to: an adjustment for prior period over-payment by Cox Cable for Local Communications Services Tax and a decline in the Hazmat Gross Receipts Tax. Municipal Revenue Sharing and Half-Cent Sales Tax revenues are also coming in at a much lower pace than budgeted. At the end of the second quarter, staff is still anticipating recognition of 98.9% of total budgeted revenues by the end of the year.

Total second quarter uses are within budget parameters at 48.8% of budget and are projected to end the fiscal year at approximately 98.3% of budget.

If projections hold, the General Fund will end the year with \$91,152,864 in revenues and \$93,827,961 in expenditures. The expenditure budget includes \$3,284,637 in appropriations from fund balance. The projected decrease in fund balance of \$2,675,097 is \$609,540 less than the amount appropriated from fund balance at the end of the second quarter. Most of the planned use of fund balance is due to appropriation of previously reserved fund balances, including prior year encumbrances. Also, this projection will be revised if additional appropriations from fund balance are approved.

Staff will continue to monitor the progress of revenues and expenditures throughout the remainder of the fiscal year.

Enterprise Funds

Stormwater Management Utility Fund

At the end of the second quarter, stormwater revenues are being recognized ahead of the budgeted pace. Fiscal year-end projected sources, before grant and capital contributions revenues, are also expected to be close to \$195,000 more than the budgeted amount.

The total operating uses, before depreciation, decreased from the prior year and are well within budget parameters at 44.8%.

Second quarter sources exceed uses by approximately \$450,000 before depreciation. As planned, based on second quarter numbers, this Fund should end the fiscal year with a

surplus, before depreciation, of approximately \$628,000, which will be used to finance Stormwater infrastructure improvements.

Ironwood Golf Course Fund

The Ironwood Golf Course Fund is performing slightly better than last year at this time. The FY 2007 second quarter deficit, before depreciation, of \$426,717 is a minor improvement over the previous year's deficit of \$436,649.

Second quarter revenues are at 41.6% of budget in FY 2007 compared to 36.1% in FY 2006. Green fees are down by about \$10,000 or 5% due to the \$2 capital surcharge fee being transferred to another unit for capital improvements. Cart fees have increased about \$11,000 or 12% from FY06 due to an increase of rounds played (1,670). Other revenue areas, such as concessions and the driving range, have shown minor decreases from FY06, 8.5% and 8% respectively. The new fee schedule effective October 1, 2005 caused a decrease in rounds played in FY 2006. This decrease was anticipated and followed the normal trends of activity in conjunction with a fee increase. FY 2007's improvement in rounds played demonstrates that consumers are adjusting to the rate increase and returning to play at Ironwood. The improved actual to budget indicators also reflect the impact of a decrease in the revenue budget and an increase in the Transfer from General Fund.

Total expenditures are at 73.1% of budget compared to 68.0% in FY 2006. Part of the increase can be attributed to normal increases in personal services and contracts. The notable increase in the pro shop area is due to large purchases made to restock inventory levels. Based on activities to date, the Golf Course is projected to end the year with an operating deficit, before depreciation, of approximately \$314,000.

Solid Waste Fund

The second quarter revenues are coming in behind last year's pace but still ahead of the budgeted pace. This decline appears to be due to timing issues related to recognition of Refuse Collection Fees. Based on the second quarter experience, staff is currently projecting fiscal year-end revenues to exceed budget by close to 2.0%.

When controlled for over \$2,941,707 in encumbrances, this Fund finished the second quarter with a surplus of only \$10,571, before depreciation. This condition is due mainly to timing issues related to recognition of revenues and expenditures. The projection for this Fund is complicated by the ongoing legal issues related to the "Old Landfill Project". If the legal expenses can be limited to \$500,000 in FY 2007, this Fund is projected to end the fiscal year with a surplus of about \$51,000 before depreciation. In addition to the "Old Landfill Project" the clean up cost associated with the "Airport Landfill Project" will continue to be an issue for this Fund in the future.

Regional Transit System

Consistent with past experiences, RTS is showing an operating surplus, before depreciation, at the end of the second quarter. As an enterprise fund, RTS depends on generating revenue from various sources to cover its expenses. Because some of these sources are derived from reimbursable grants, there is usually a timing lag when it comes to recovering revenues to cover expenses. The FTA Grant revenue is an example of this type of revenue which normally lags behind average budgeted pace. In FY 07, delay in receipt of FTA Grant revenue was offset by increases in revenues from FDOT and University of Florida.

This Fund had an operating surplus, before depreciation, of about \$1,085,000 at the end of the second quarter. The surplus, is due primarily to faster recognition of revenues from FDOT Grants and University of Florida .

After controlling for timing issues, mentioned previously, current projections for FY 07 anticipates a small surplus , before depreciation, of approximately \$6,000.

Internal Service Funds

Fleet Management Fund

Overall, the Fleet Management Fund is stable and performing in accordance with budgeted dollars and internal service fund principles.

As an internal service fund, Fleet Management recovers its operating costs through charges for services to its customers (i.e., General Government and GRU Departments) that require fleet services and repairs. When controlled for encumbrances, the first half revenues exceeded expenditures by \$164,358. Current projections are for a surplus of about \$273,000 for the year, which is consistent with the budgeted surplus. If the surplus continues through the end of FY2007, it will be addressed as part of the year-end true-up process to reflect the “break-even” philosophy of this fund.

General Insurance Fund

The General Insurance Fund is projected to finish the fiscal year with a surplus. The first half of FY 07 ended with a surplus of \$367,432.

Although second quarter revenues recognized decreased in FY 07 compared to FY06, they still exceed budgeted parameters.

Total uses ratio also decreased from 67.6% in FY 06 to 54.7% in FY 07. A significant portion of this decrease is due to decreases in insurance premiums and worker's compensation claims. Total uses include \$165,000 in encumbrances in FY 07 compared to \$216,000 in FY 06.

This Fund is projected to end the fiscal year with a surplus of about \$601,000 before depreciation expense. Projections for this Fund are difficult, and subject to a greater margin of error due to the volatile nature of self-insurance programs for worker's compensation and other liability accounts.

Employees Health & Accident Benefits Fund (EHAB)

Through the first half of this year, the EHAB Fund shows no significant deviations from budgeted parameters. As a percent of budget, revenues decreased slightly from 51.4% in FY 06 to 47.9% in FY 07. This decrease in the sources ratio can be attributed to an increase in the revenue budget from FY06 to FY07 and to timing issues related to the transfer from the REHAB Fund.

Although the total uses ratio decreased from 55.6% in FY06 to 54.7% in FY 07, the actual expenditures increased by close to \$789,000. The decrease in the uses ratio is mostly due to increases in the uses budget, primarily for claims paid. Some of the increases in the actual uses are caused by accounting change in the way administrative cost and stop-loss insurance premiums are encumbered.

At this point, staff is projecting a surplus, before depreciation, of about \$569,000 at the end of this year.

Trust Funds

Retiree Health & Accident Benefits Fund (REHAB)

The performance of the REHAB fund through the first half of FY07 has improved significantly from the previous year. The actual revenue to budget ratio increased from 78.2% of budget to 99.8%, well above the budgeted pace. The increase in the first half revenues can be attributed to an increase in interest income as a direct result of the Other Post Employment Benefit Obligation Bond of 2005.

The second quarter expenditures decreased by \$314,000 from the previous year, mostly due to slower recognition of insurance premium expenditures. The actual to budget ratio mirror this decrease, with a ratio of 45.5% in FY 07 compared to 64.5% in FY 06.

Currently, staff projects a year-end surplus of approximately \$2.7 million. This would increase the retained earnings to approximately \$54 million and further the goal of building up retained earnings to meet the actuarial liabilities in this Fund.

Given the volatility of expenditures for claims, it is difficult to develop firm projections in the EHAB and REHAB funds based on second quarter activity. The performance of both funds has consistently improved since the new plan designs were implemented. As we move further into 2007, claims activity will give us a better indication of the impacts of this change. Staff will continue to monitor activities and revise projections as appropriate on a quarterly basis.
