April 18, 2013

To: Gainesville Police Department

We have carefully discussed the proposal of towing companies and Police Department using the same computer system. We believe this system can be beneficial for all involved. This will make the business relations between police department and towing companies uniformed. We offer our support and praise your efforts to make our business relationship more efficient for all involved. We do have some concerns to this new software. I know it was proposed that there will be an increase in rotation fees to help pay for the system. We are happy to support this new system as long as towing companies do not lose any additional revenue.

We look forward to working closely with you on implementing this new system.

Sincerely,

Kevin Whitesides
