# Introduction

## PROJECT OVERVIEW

The City of Gainesville has developed a unique and unified wayfinding park standards system for its parks and public spaces. This completed wayfinding system informs visitors of amenities and destinations within the parks; identifies the parking area; and provides guidance on locating amenities, features and destinations once within the parks.

Two parks were selected to serve as case studies for the wayfinding standards: Alfred A. Ring Park (“Ring Park”), and Albert Ray Massey Westside Park (“Westside Park”). By studying these two parks, a holistic wayfinding system that can be expanded to the rest of the City parks was created. This process resulted in the creation of a Design Intent Document that can be used by sign companies to prepare detailed construction shop drawings for the fabrication and installation of the signs.

This document sets out the principles, guidelines and specifications for implementing a comprehensive wayfinding system for the City of Gainesville parks. The document is intended as a tool for the planning and design of wayfinding information across the park network beyond the case study. It provides the basis for undertaking specific projects as part of a growing and coordinated approach towards parks information.

These guidelines and standards represent the work done to date in the development of new wayfinding information.

Through the process of implementation, the standards will be reviewed and refined to ensure that they are comprehensive, robust and long-lasting.

While this document includes guidelines and standards for the majority of wayfinding elements within the parks, there are a number of components intentionally not covered by the document. It is understood that each park in Gainesville is unique. As a result, the signs allow for the incorporation of unique graphics for parks that require a unique treatment.

## THE STRUCTURE OF THIS REPORT IS AS FOLLOWS

### SECTION 1 INTRODUCTION

Introduces to the overall document and its structure

### SECTION 2 SIGN DESIGN PALETTE

Displays the entire family of signs created for the City parks

### SECTION 3 GRAPHIC STANDARDS

Outlines fonts, colors, and all graphic information displayed on signs

### SECTION 4 MAPPING STANDARDS

Provides graphic recommendations and specifications for the creation of future park maps

### SECTION 5 SIGN SPECIFICATIONS

Provides sign design intents for fabrication and shows how the information will be displayed by sign typologies.

Highlights sign placement based on sign types.

### HOW TO USE THIS DOCUMENT

This Wayfinding Standards document is intended as a set of principles, guidelines and specifications, based on work undertaken to date.

It describes wayfinding thinking, the needs of each park type and the methods used to develop a comprehensive wayfinding system. It is a technical document for use in the sign implementation or park update process.

This document is intended to be used in the sequence of the Analysis Report and the Park Design Standards. This is necessary to ensure that the implementation of the system be carried out in as logical and effective a way possible from first concepts to final installation.

### WHO SHOULD USE THIS DOCUMENT

The document should be used as a constant reference for anyone considering customer information or circulation in park facilities, whether specifically for wayfinding or not. It is intended that the Park Design Standards and the Wayfinding Standards have a broad and growing influence on the physical environment and how information is applied to the parks.

The document is intended for professionals in park planning, wayfinding and information design who will be familiar with the terms and concepts used in this document, as applied to their area of expertise.

### PARK TYPES

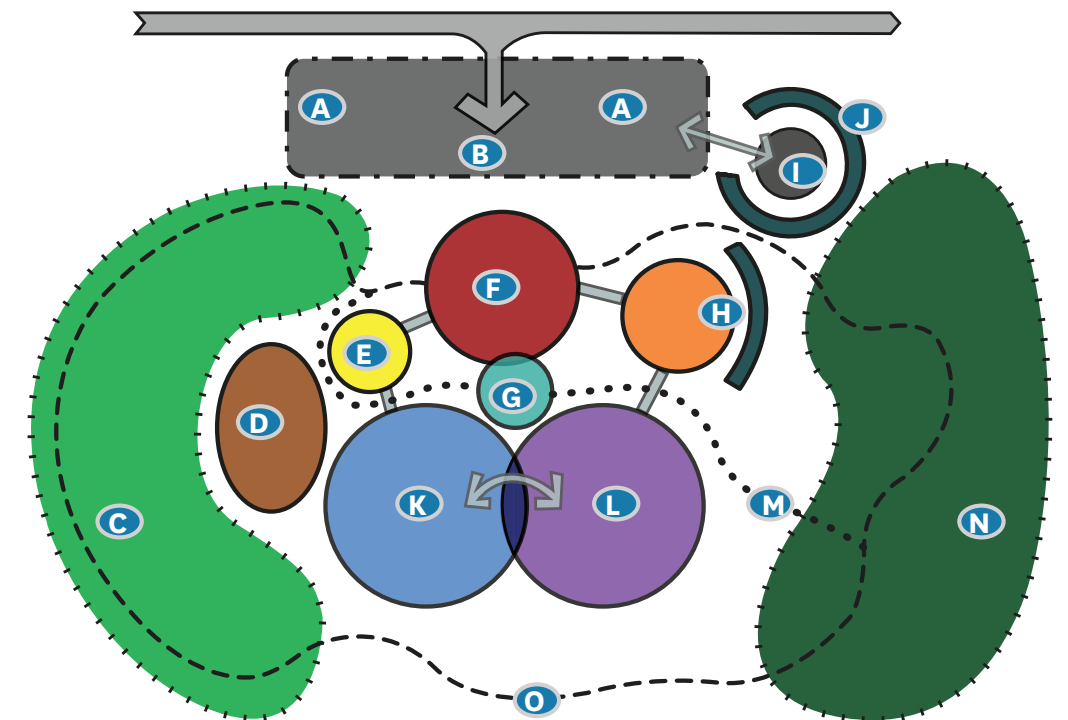

In order to unify parks and dictate what sign types are needed at which parks, all parks need to be categorized. The Park Design Standards reference three (3) types of parks - See pages 31-33

- Active Park
- Nature Based Park
- Neighborhood Park

For wayfinding purposes we would need to divide neighborhood park into two groups. Parks that are over 0.5 acres and smaller scale neighborhood parks that are 0.5 acres or under.

The next page shows the park type diagrams in order to get a sense of the amenities found at each park type. The diagrams were taken from the Design Standards and depict the relationship between park elements and activities in each park type.

### Active Park

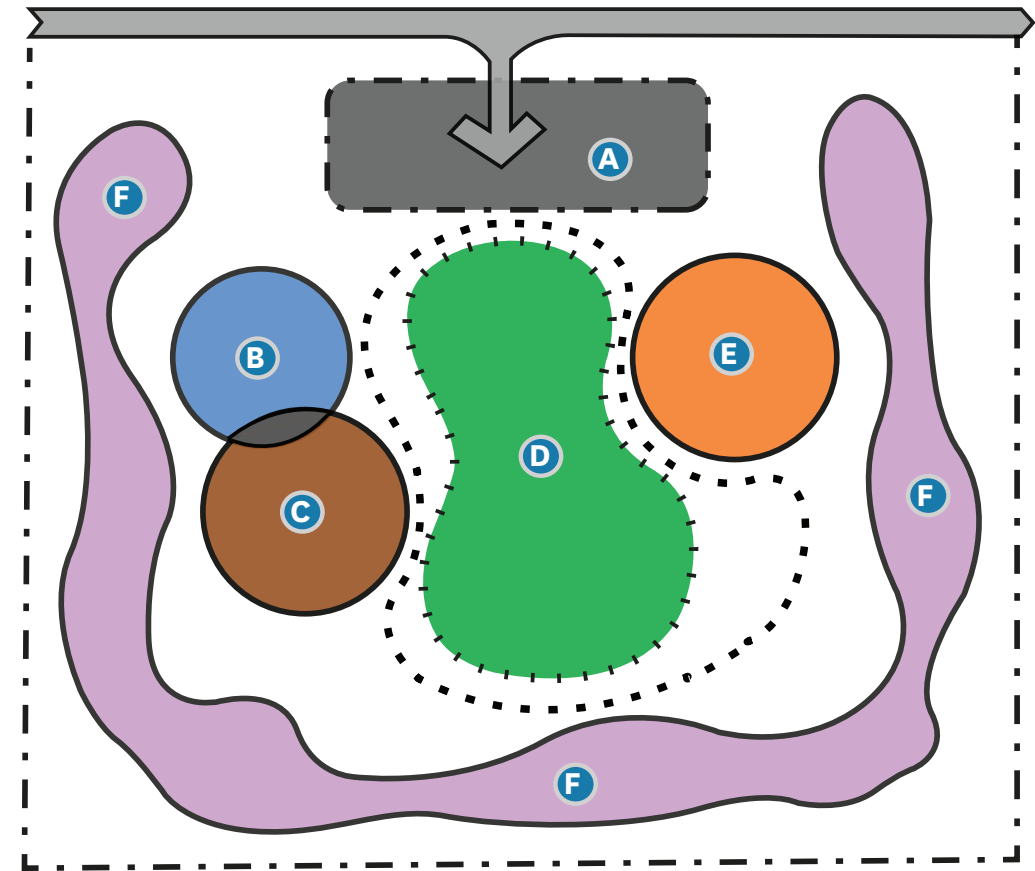

- |                                    |                               |
|------------------------------------|-------------------------------|
| <b>A</b> PARKING                   | <b>I</b> MAINTENANCE/STORAGE  |
| <b>B</b> ENTRY                     | <b>J</b> BUFFER               |
| <b>C</b> FLEXIBLE OPEN SPACE       | <b>K</b> YOUTH SPORTS         |
| <b>D</b> PICNIC                    | <b>L</b> ADULT SPORTS         |
| <b>E</b> PLAYGROUND                | <b>M</b> INTERNAL CIRCULATION |
| <b>F</b> CONTROL BLDG/STAFF OFFICE | <b>N</b> NATURAL AREAS        |
| <b>G</b> RESTROOM                  | <b>O</b> PERIMETER TRAIL      |
| <b>H</b> COURT PLAY                |                               |

Nature Based Park

- A** PARKING
- B** DENSE BUFFER
- C** TRANSITION ZONE WITH EDUCATION
- D** SHELTER
- E** PARK OFFICE/RESTROOM
- F** DISCOVERY NODES
- G** CIRCULATION

Neighborhood Park

- A** LIMITED PARKING
- B** PLAYGROUND
- C** PICNIC
- D** FREE PLAY/OPEN SPACE
- E** COURT PLAY
- F** LOW NOISE ZONE  
(IN RESIDENTIAL AREAS)

Under 0.5 acres

- Hibiscus Park
- Oak Hill Park
- Phoenix Park
- Sharmie Ffar Park

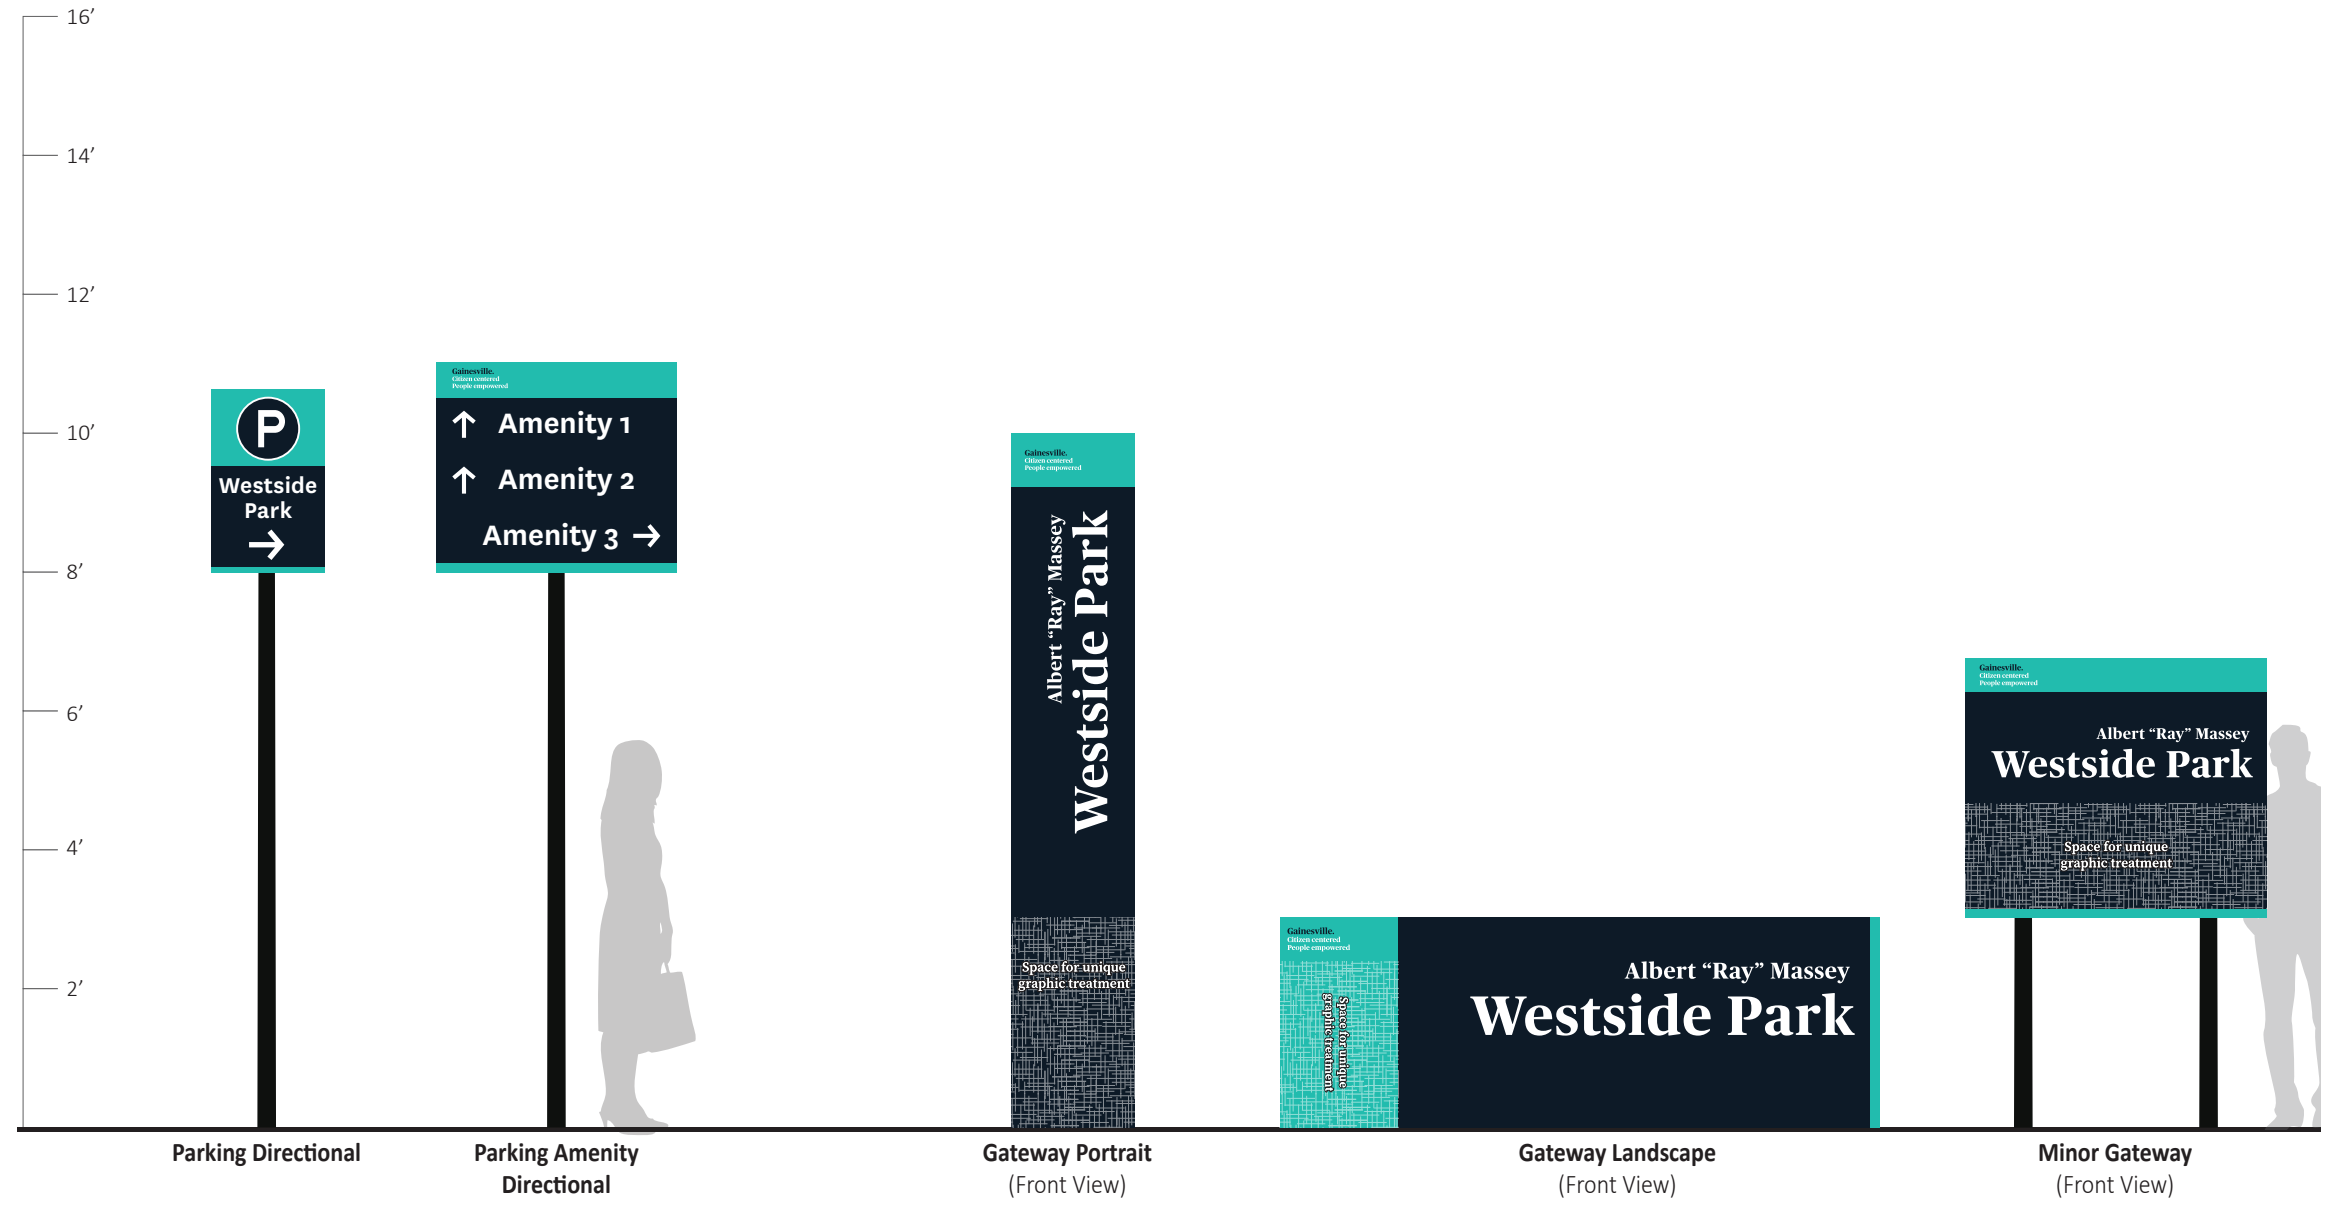

**Sign Design Palette**

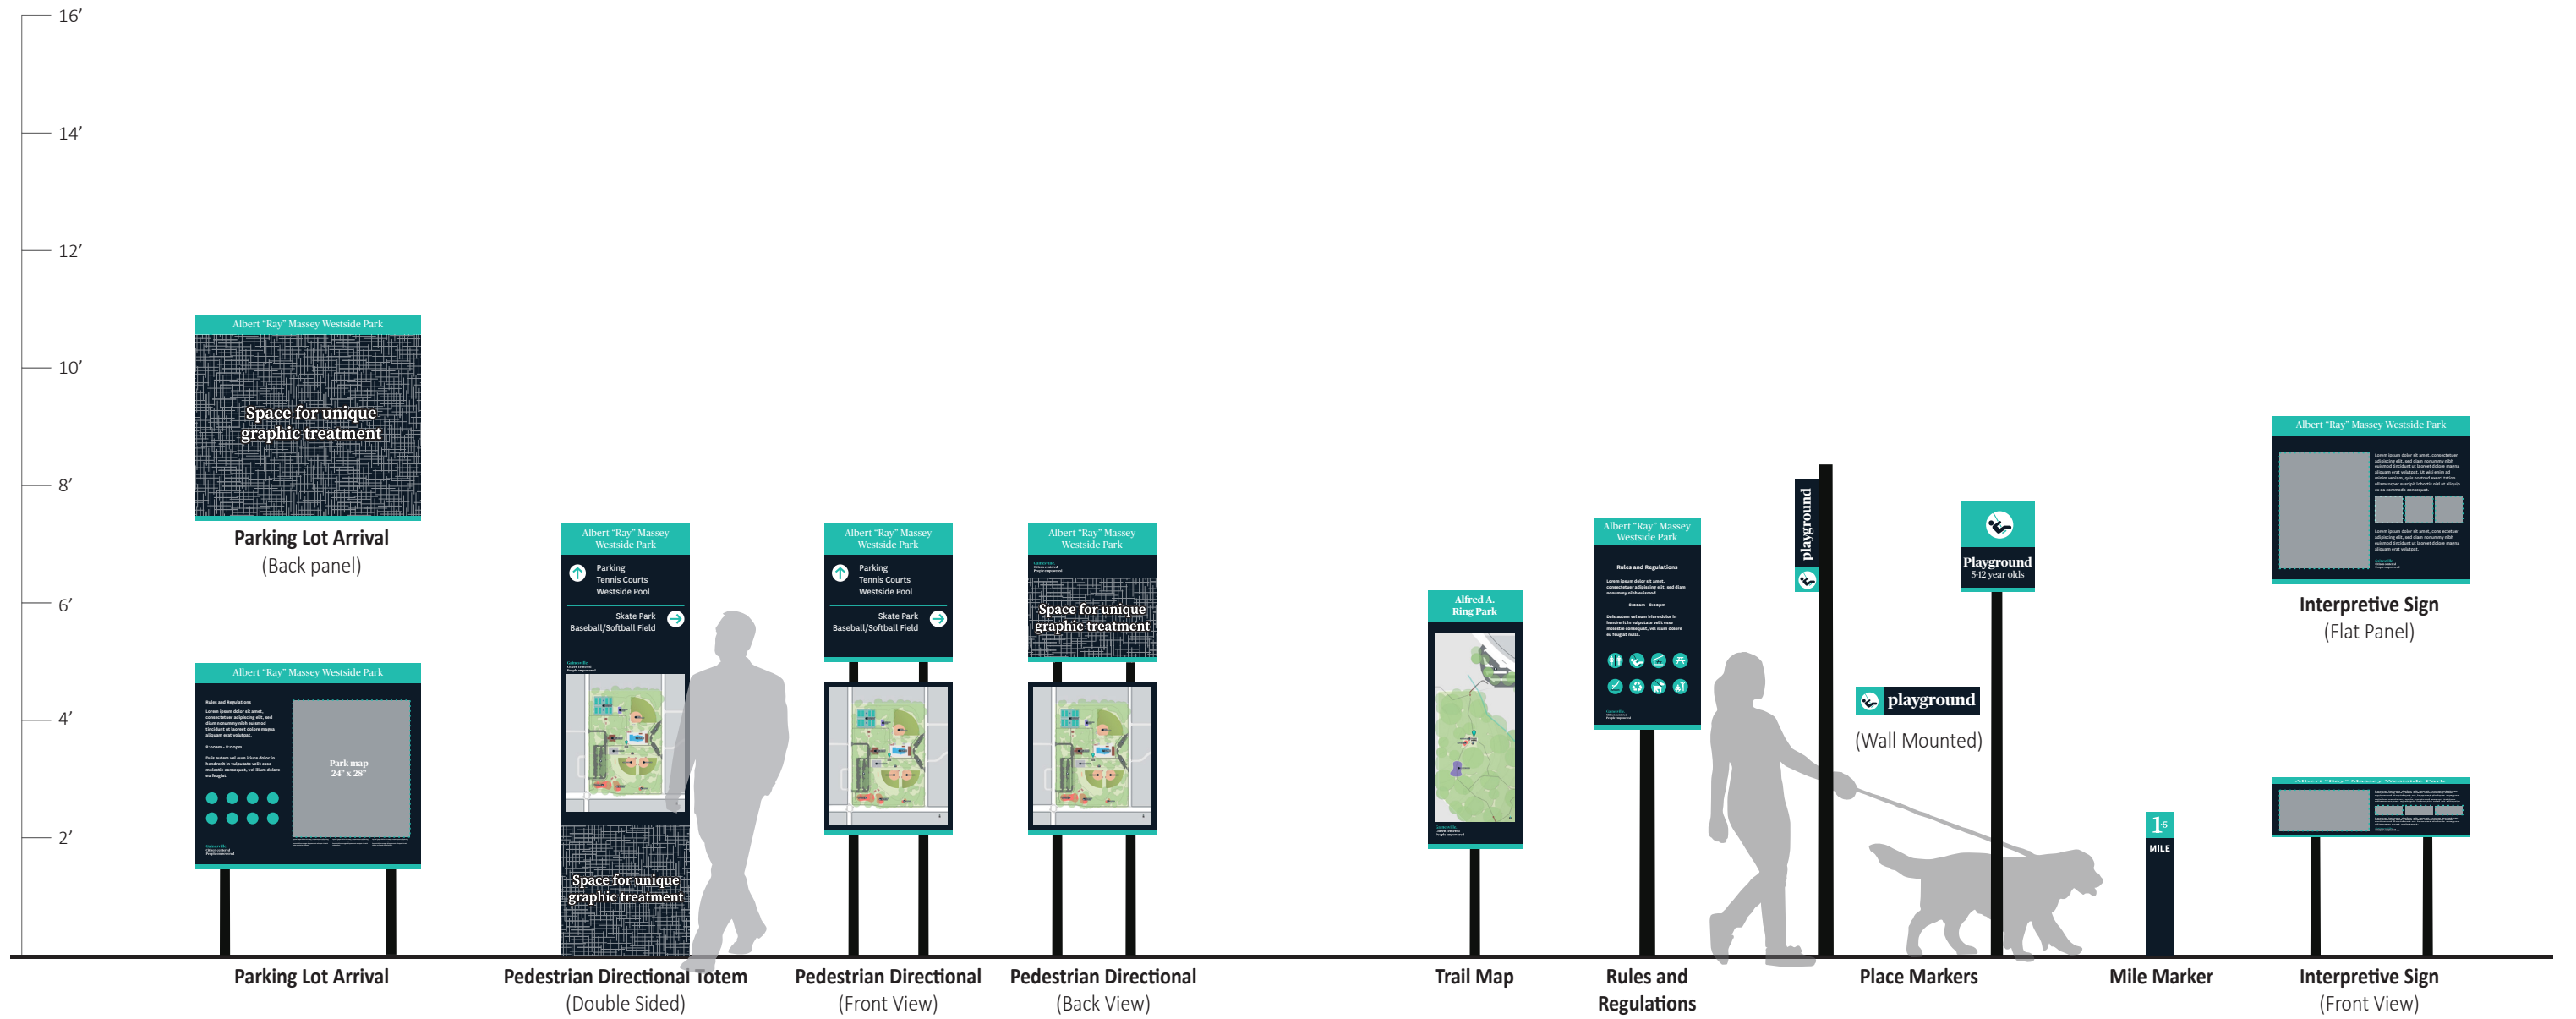

**WAYFINDING SIGN FAMILY**

Based on the recommendations from the Analysis Report three (3) sign design options were created.

After public and stakeholder feedback, a palette was selected and refined. The following pages show the full design palette for the City of Gainesville parks

3

# Graphic Standards

### GAINESVILLE UNBRAND

The analysis report highlighted the logos to be used on the wayfinding system. In order to link all parks to the City of Gainesville, the unbranded wordmark should be used consistently throughout the system. Section 5 details logo placement on all sign types.

#### Unbranded Wordmark

**Gainesville.**  
**Citizen centered**  
**People empowered**

#### Unbrand Colors

#### WSPP Brand

Completed Projects

### COLORS AND MATERIALS

Consistent use of a color palette creates a recognizable “system”. The Color Palette found on the following page provides a reference for specifying a paint color or material.

The Fabricator is required to submit painted color chips and material samples for approval prior to sign fabrication before every project.

*The ADA requires a minimum of 70% contrast between text and background for legibility.*

#### Unbrand Colors Used on Signs

#### Unbrand Colors Used on Maps

#### Sign Paint Colors

	Code	Name	Specification	Process
	P1	White	Pantone White	Surface applied, exterior sign paint and protective top coat: Acrylic Polyurethane w/ UV inhibitor, finished with Clear Coat Satin finish.
	P2	Navy	PMS 296C	Surface applied, exterior sign paint and protective top coat: Acrylic Polyurethane w/ UV inhibitor, finished with Clear Coat Satin finish.
	P3	Teal	PMS 3265C	Surface applied, exterior sign paint and protective top coat: Acrylic Polyurethane w/ UV inhibitor, finished with Clear Coat Satin finish.

#### Sign Vinyl Colors

	Code	Name	Specification	Process
	V1	White	3M Scotchcal	Background & Characters 3M custom inks applied directly to 3930 with 3M approved clear UV/Graffiti Vinyl Over-laminates.
	V2	Deep Navy Blue	3M Scotchcal	Background & Characters 3M custom inks applied directly to 3930 with 3M approved clear UV/Graffiti Vinyl Over-laminates.
	V3	Dark Aqua	3M Scotchcal	Background & Characters 3M custom inks applied directly to 3930 with 3M approved clear UV/Graffiti Vinyl Over-laminates.
	V5	White Retro Reflective	3M Entineer Grade Retro Reflective White	Engineer-grade retro reflective vinyl meeting or exceeding FDOT requirements for day and night driving.

**TYPEFACES**

This page provides a reference for the typefaces for the Wayfinding Signage System. Typefaces may not be changed. During fabrication, the height and width ratio of letter forms must be maintained proportionately.

**Vehicular Signage:**

Parking Directional and Parking Amenity Sign Typeface for vehicular signs is National Semibold.

Signs placed on parking lots with a speed limit of 25MPH and lower shall have 4" high type. Type shall be upper and lower case.

**Pedestrian Signage:**

Minimum 1" high copy is recommended for pedestrian directional signs.

*Serif fonts can only be used on pedestrian signs.*

**Typeface A - National Regular**

ABCDEFGHIJKLMNOPQRSTUVWXYZ  
abcdefghijklmnopqrstuvwxyz  
1234567890

**Typeface B - National Semibold**

ABCDEFGHIJKLMNOPQRSTUVWXYZ  
abcdefghijklmnopqrstuvwxyz  
1234567890

**Typeface C - National Bold**

ABCDEFGHIJKLMNOPQRSTUVWXYZ  
abcdefghijklmnopqrstuvwxyz  
1234567890

**Typeface D - Publico Roman**

ABCDEFGHIJKLMNOPQRSTUVWXYZ  
abcdefghijklmnopqrstuvwxyz  
1234567890

**Typeface E - Publico Bold**

ABCDEFGHIJKLMNOPQRSTUVWXYZ  
abcdefghijklmnopqrstuvwxyz  
1234567890

**AMENITY ICONS**

To be used in support of text labelling of specific parks services, across all applications.

The icon set is currently being developed and should be updated as soon as it is complete. The icon set shall be distributed and controlled to ensure consistent use.

*Icons can only be used on pedestrian signage once the user has time to read the label and understand what each icon means. Unless the icon is a universal icon, it should not be used by itself.*

**RULES ICONS**

To be used in support of text highlighting appropriate use of the park systems.

The icons shown to the right are to be used in any sign that displays the rules and regulations of the park.

**Clean up and dispose of all trash.**

**Pets are welcome. Leash and clean up after them.**

**Digging is not permitted.**

**Respect the wildlife around you. Stay on the trail.**

**Use only the grills provided in the park.**

**Respect park hours. Camping is not permitted.**

# Mapping Standards

### MAPPING OVERVIEW

Two maps were created as part of the project based on the two case studies: Albert Massey Westside Park and Albert A. Ring Park.

Albert Massey Westside Park is an active park, while Albert S. Ring is a nature based park. This section of the standards intends to guide City designer through the creation of new park maps.

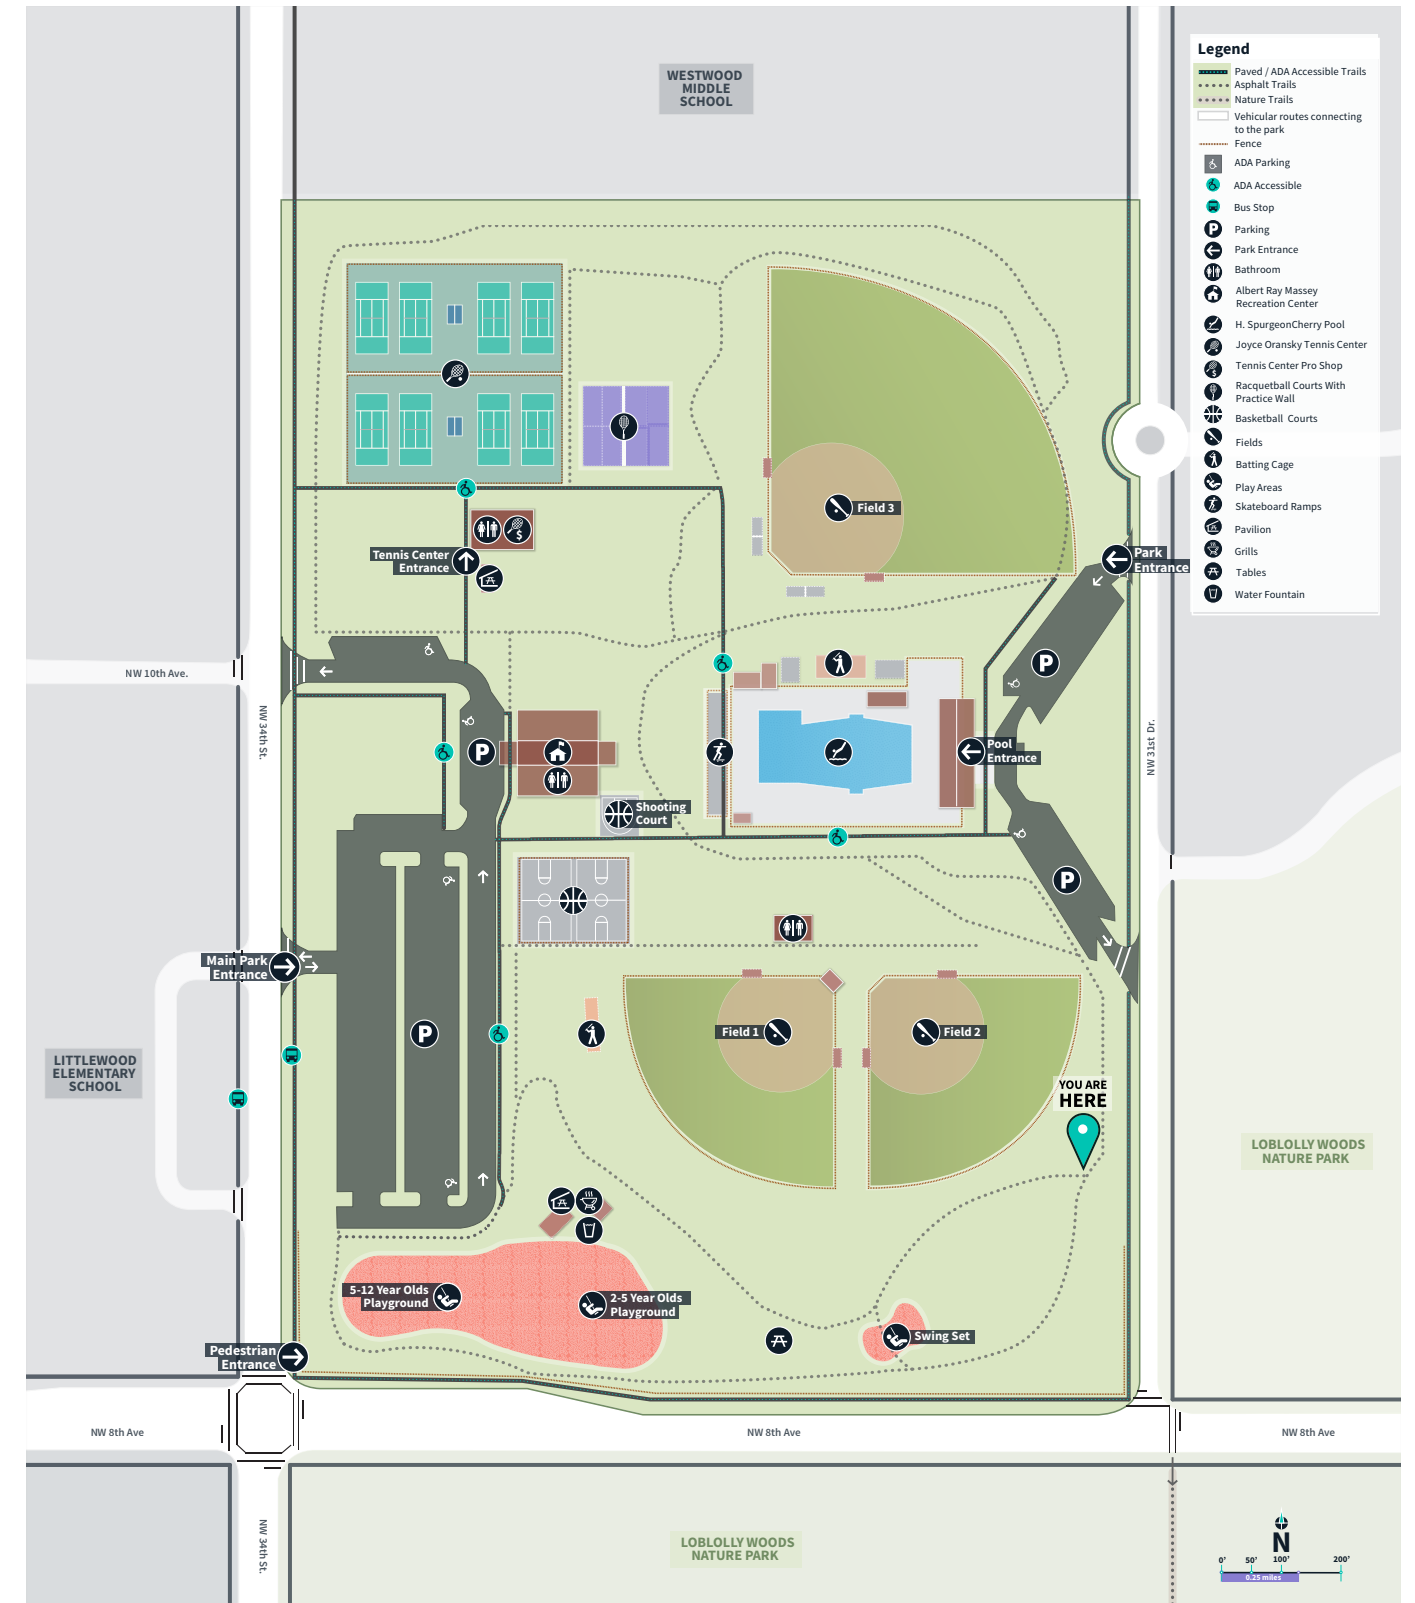

Active and Nature based parks will have a north up map and display the entire park on them. All north up maps shall show the park and the connections between park and City.

Neighborhood parks will have a north up map and display the whole park on them. If the neighborhood park is 0.5 acres or less they will not need a map.

### A maintainable level of detail

The City will ultimately be responsible for maintaining the maps and cannot be responsible for local detail, such as a shop unit changing. Therefore, when designing a future parks map, keep City connections limited to areas that are consider destinations and avoid adding names to retail or food and beverage connections.

### Active Park Map - Albert Ray Massey Park

### Nature Based Map - Alfred A. Ring Park

### Alfred A. Ring Park to Scale

**MAPPING ELEMENTS**

Every element within the maps have a different mapping treatment. The following pages will show those graphic treatments for the park elements shown in the maps.

**North and Scale Marker**

**You Are Here Marker**

**YOU ARE  
HERE**

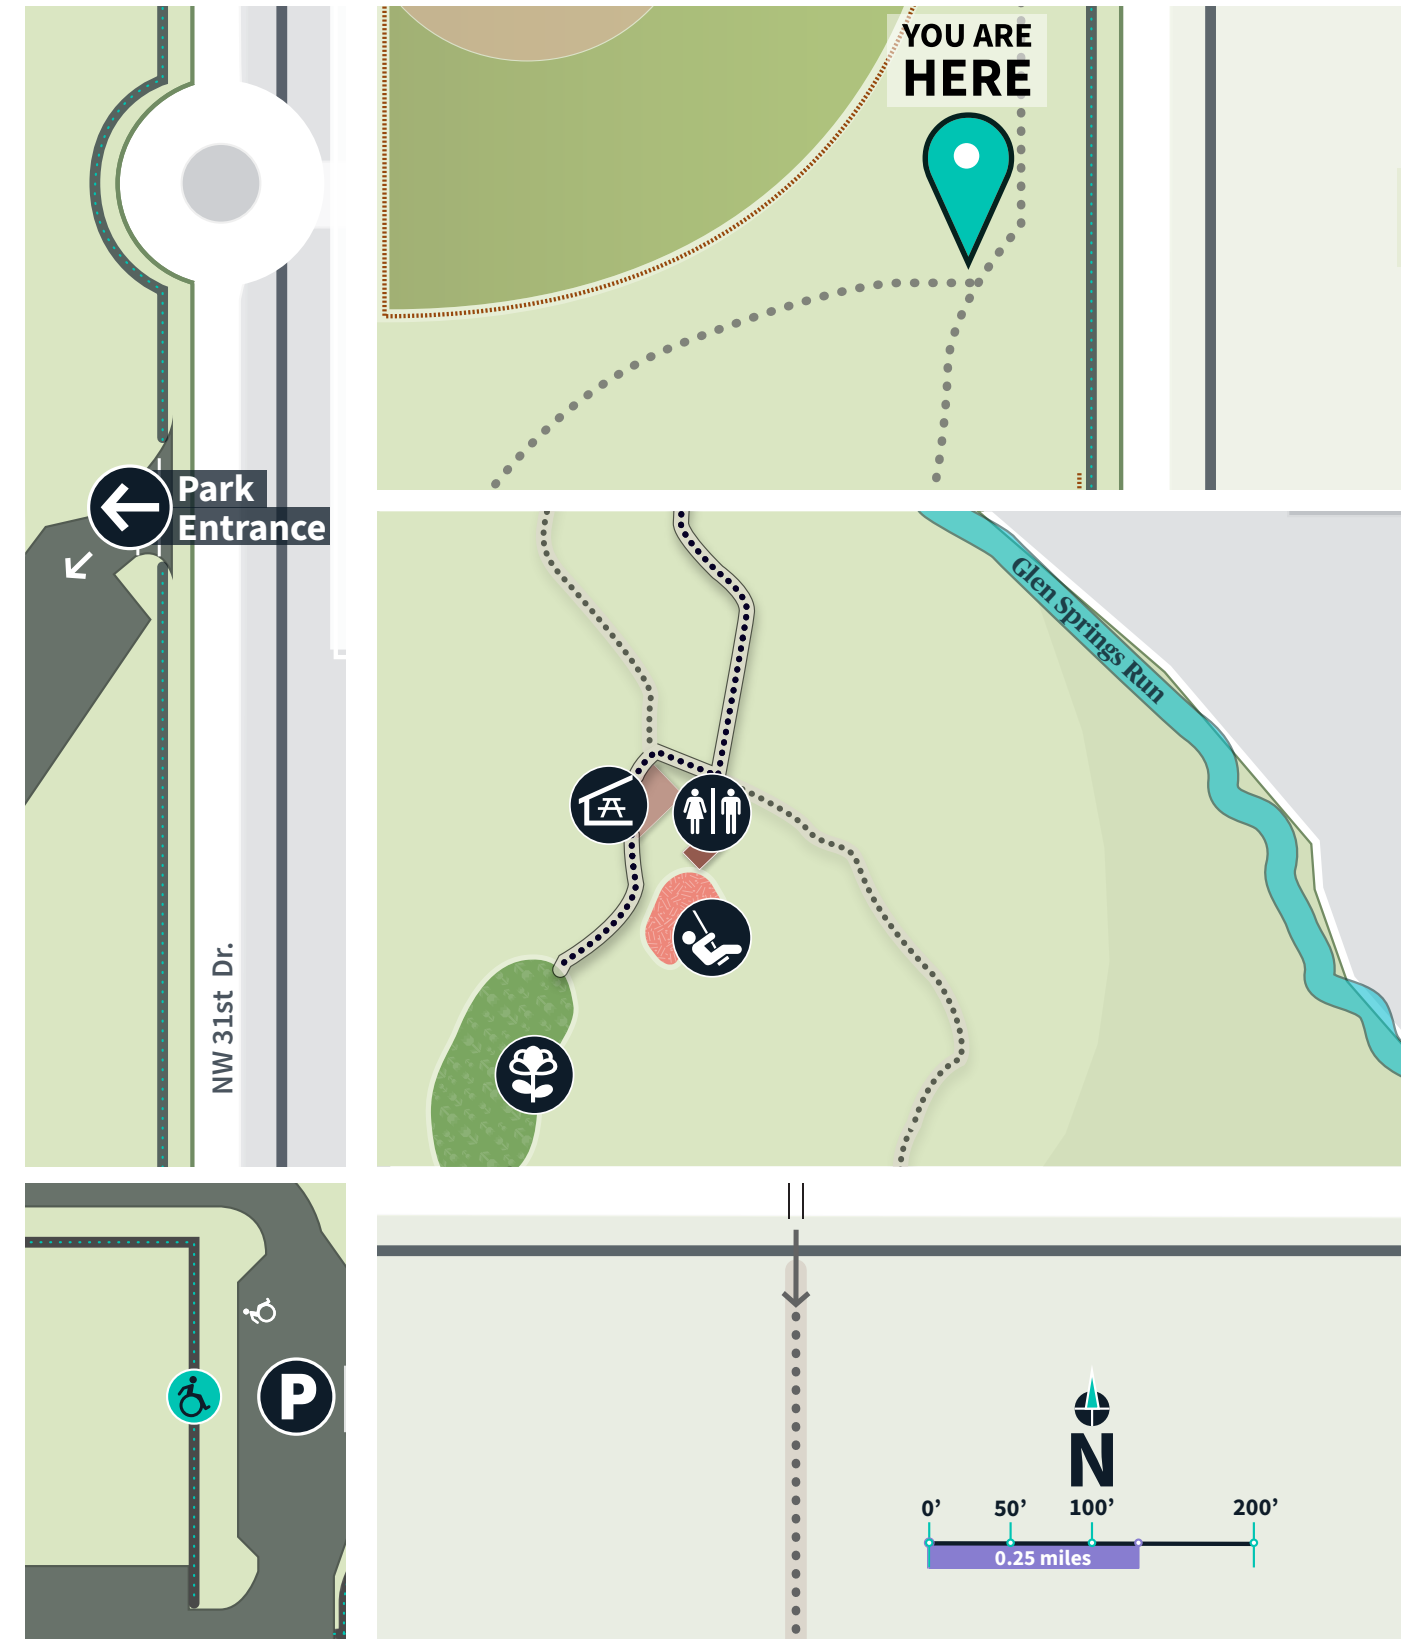

**Icons with labels**

Icons are labelled in the Legend on each map, unless there are 2 or more of the same icon on the map. When 2 or more icons are present, the icon needs to have a label to differentiate the icons.

## Sign Specifications

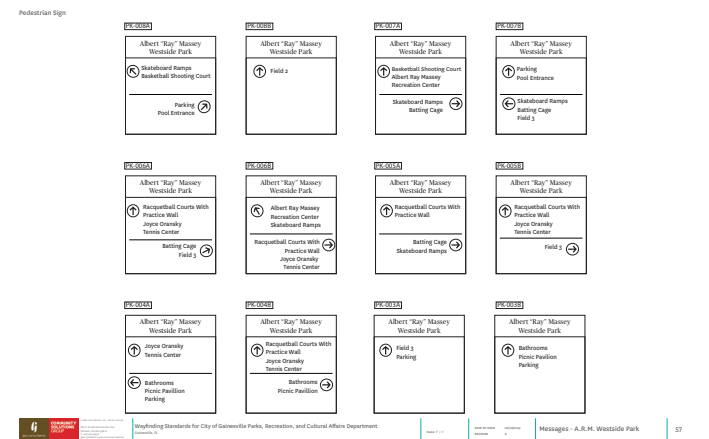

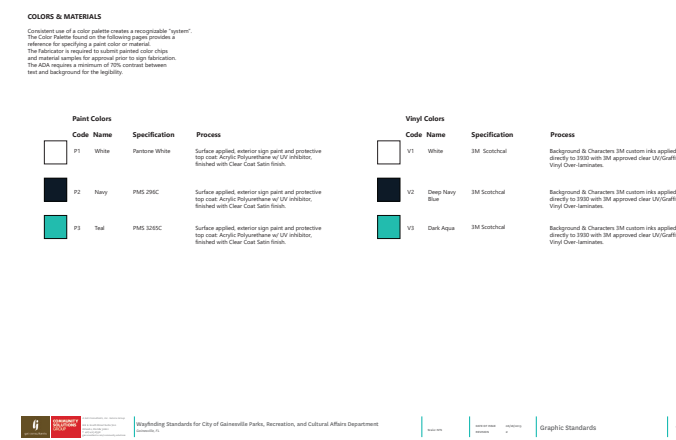

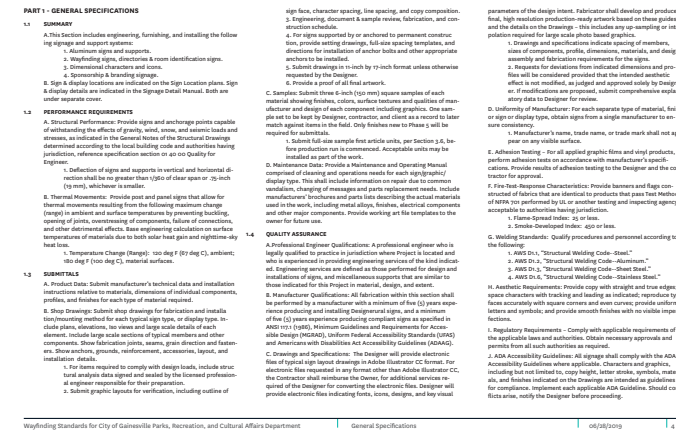

## DESIGN INTENT DOCUMENT

In addition to this document, a Design Intent Document (DID) was created to provide enough information to take projects out to Bid. The fabricator shall create construction documents and will be in charge to meet and study structural and engineering needs before the signs are implemented.

The first pages of the DID cover general specifications that the fabricator has to follow when creating all signs within the system. Following the General Specifications are the specific fabrication details for each of the signs within the system. The pages to the right are examples of pages in the DID.

**PARKING DIRECTIONAL**

Scale 1in = 1ft

### UNIQUE GRAPHICS ON SIGNS

All sign types have a designated space on them to be used as a unique graphic element to represent the character of the park they will be located in. The graphics on the right are a visual example of what those unique elements could look like..

**EXISTING KIOSK TEMPLATE**

Nature based parks are currently using two size of wood kiosks as their standards. Nature based parks will continue to use these kiosks, so a template was created to incorporate the new system to the current standards.

Texts and graphics are being used as placeholders. The City will provide final graphics following the templates on the left.

**Small Kiosk Template**

Size: 52.5 x 28.75 in

**Large Kiosk Template**
