Hello John,

I will keep our commitment. Unfortunately, we are have had some setbacks weather wise, with the prior drought condition, irrigation issues and now excessive rain.

We will keep with our plan to apply herbicide and fertilize, as well as repairing washouts and ware areas. I have copied John Morris so that he can set up a meeting at forest so we can discuss where we are with the plan, and look at what we can do in the meantime considering the current circumstances.

Thank you,

Vernest

Subject: ? About Forest Park

Vernest,

In a meeting I was at yesterday, a question was raised about the trees along 43rd Street at Forest Park. There is a concern that they pose some vision impacts. Is there a plan to prune or clean up this area and is there in fact an issue with sightline for traffic exiting the overflow parking lot? Where the trees planted and is there any opportunity to move them if a vision issue does exist?

Thanks

John,

As per our phone discussion today, herbicide treatment is scheduled for Thursday or Friday weather permitting. The following week of 7/17 a more aggressive treatment for goose grass eradication applied by back pack is scheduled. First week of August we will start filling in ware spots along with aeration. Mid-August you should see result. Continuation of Fertilization, aeration, general maintenance will be applied weekly through the month of September. I will be happy to meet with you weekly on site for progress updates.
