**Recent Referrals**

001584 Green Building  
002570 Safe Space

\*This item is related to 001503 through 001512. All should be removed. The implementing committees of the Ad Hoc Committee on University Neighborhoods originally had intended to work directly with Commission Committees on their implementation topics. They have since decided to make a full report to the City Commission, and request a workshop of the full City

Commission during the summer. The Community Development Committee discussed this and decided that they would rather the referrals be removed at this time and that referrals, if any, be created after such full Commission discussion.

\*\*Staff plans to present this item to the City Commission at its June 24, 2002 meeting, when the research and report are complete. At that time, the Community Development Committee has requested that staff include language removing the item from the referral list.
