## Appendix A - Comprehensive Plan GOPs

### Exhibit A-1

#### Future Land Use Element

**Policy 4.1.1** - Land Use Categories on the Future Land Use Map shall be defined as follows:

##### Mixed-Use Low Intensity (8-30 units per acre)

This category allows a mixture of residential and non-residential uses such as standard lot single-family houses, small-lot single-family houses, duplex houses, townhouses (attached housing), accessory dwelling units, group homes, multi-family housing (if compatible in scale and character with other dwellings in the proposed neighborhood), offices scaled to serve the surrounding neighborhood, retail scaled to serve the surrounding neighborhood, public and private schools, places of religious assembly and other community civic uses, and traditional neighborhoods on sites 16 acres or larger in conformance with the adopted Traditional Neighborhood Development (TND) ordinance. Residential development shall be limited to 8 to 30 units per acres. Lots that existed on November 13, 1991 and that are less than or equal to 0.5 acres in size shall be exempt from minimum density requirements. Intensity will be controlled, in part, by adopting land development regulations that establish height limits of 5 stories or less; however, height may be increased to a maximum of 8 stories by special use permit. Land development regulations shall establish the thresholds for the percentage of mixed uses for new development or redevelopment of sites 10 acres or larger. At a minimum, the land development regulations shall encourage that: at least 10 percent of the floor area of new development or redevelopment of such sites be residential; or, that the surrounding area of equal or greater size than the development or redevelopment site, and within 1/4 mile of the site, have a residential density of at least 6 units per acre. Residential use shall not be a required development component for public and private schools, institutions of higher learning, places of religious assembly and other community civic uses. Buildings in this category shall face the street and have modest (or no) front setbacks.

This category shall not be used to extend strip commercial development along a street. Land development regulations shall ensure a compact, pedestrian-friendly environment for these areas, and provide guidelines or standards for the compatibility of permitted uses.

##### Mixed-Use Medium Intensity (12-30 units per acre)

This category allows a mixture of residential, office, business and light industrial uses concentrated in mapped areas. This category shall also allow traditional neighborhoods on sites 16 acres or larger in conformance with the adopted Traditional Neighborhood Development (TND) ordinance. Public and private schools, institutions of higher learning, places of religious assembly and community facilities shall be appropriate in this category. Such development shall function as neighborhood center serving multiple

neighborhoods. It is not expected that these areas shall be expanded significantly during this planning period. Land development regulations shall ensure a compact, pedestrian environment for these areas; provide guidelines for the compatibility of permitted uses; and ensure that such areas do not serve overlapping market areas of other designated medium-intensity neighborhood centers. Residential development shall be limited to 12 to 30 units per acre. Lots that existed on November 13, 1991 and that are less than or equal to 0.5 acres in size shall be exempt from minimum density requirements. Intensity will be controlled, in part, by adopting land development regulations that establish height limits of 5 stories or less; however, height may be increased to a maximum of 8 stories by special use permit. Land development regulations shall establish the thresholds for the percentage of mixed uses for new development or redevelopment of sites 10 acres or larger. At a minimum, the land development regulations shall encourage that: at least 10 percent of the floor area of new development or redevelopment of such sites be residential; or, that the surrounding area of equal or greater size than the development or redevelopment site, and within 1/4 mile of the site, have a residential density of at least 6 units per acre. Residential use shall not be a required development component for public and private schools, institutions of higher learning, places of religious assembly and community facilities. Buildings in this land use category shall face the street and have modest (or no) front setbacks.
