

TO: Historic Preservation Board

Item Number: 1

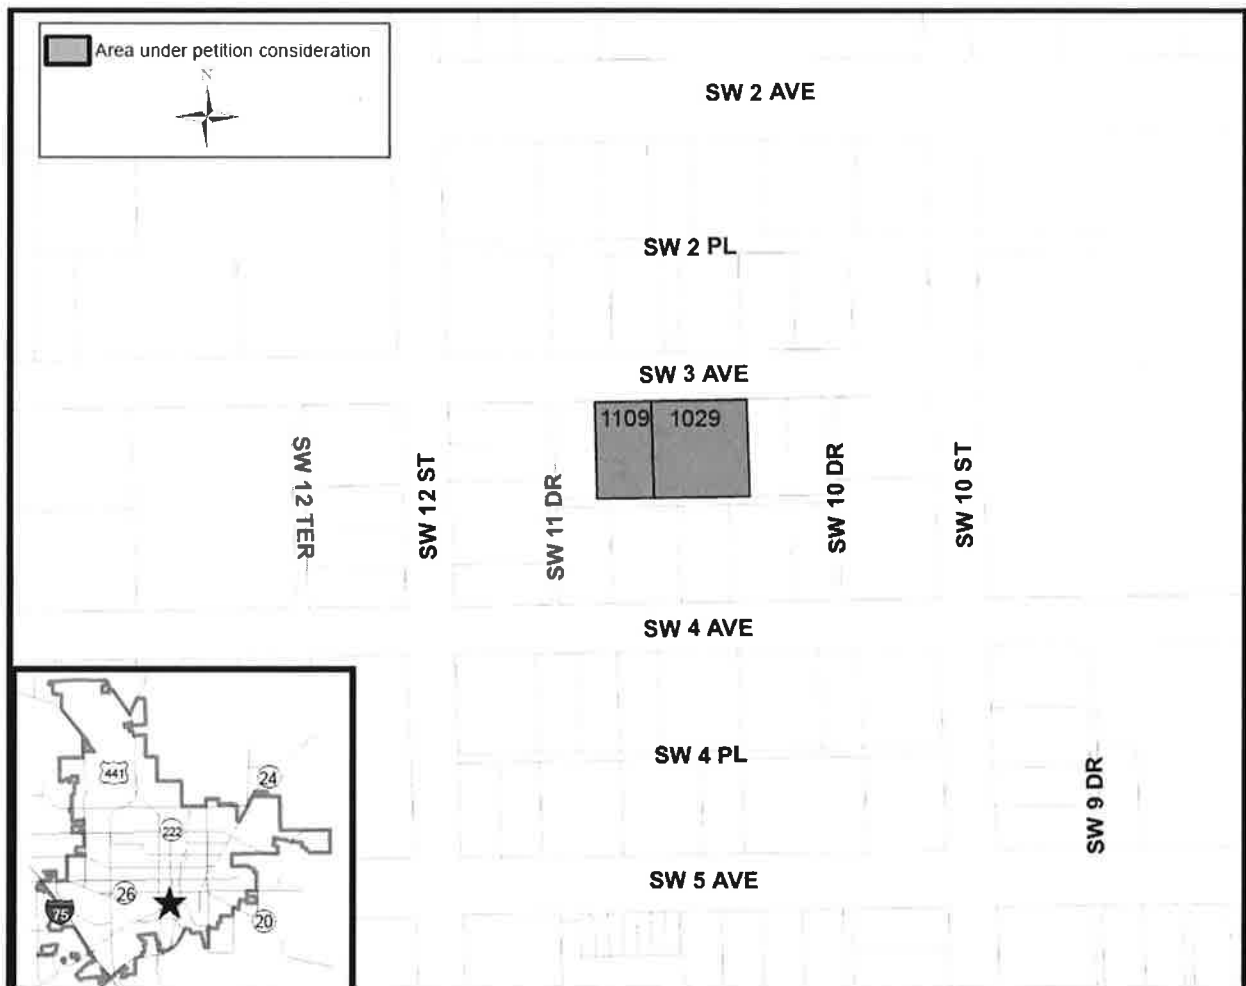

FROM: Planning & Development Services Department
Staff

DATE: Nov. 3, 2015

SUBJECT: Petition HP-15-68. Ricardo Cavallino, agent for SHD Development.
Relocate a single-family dwelling located at 1109 SW 3rd Avenue to the northeastern portion of parcel #13096-000-000. Related to HP-15-69, HP-15-70, and HP-15-72. This building will remain a contributing structure to the University Heights Historic District – South.

Recommendation

Staff recommends approval of the application with the conditions listed on page 2.

Conditions of Approval

Staff's recommendation of approval for the petition is based on the following conditions:

1. The HPB approve the front setback distance of 8 feet 5 inches.
2. Care will be taken to ensure that all character defining features are adequately protected from damage/loss during the moving process.

Project Description

This project involves the relocation of a single-family dwelling from Parcel #13095-000-000 (1109 SW 3rd Avenue) to the northeastern portion of adjacent parcel #13096-000-000 (1029 SW 3rd Avenue). The move will be part of a larger project to create multi-family housing on Parcels 13095-000-000, 13096-000-000, and 13098-000-000. The petitioner has requested to demolish all additions to the building, bringing it back to a rectangular shape. The 1961 update of the Sanborn Fire Insurance Maps indicate the presence of the central portion of the southern rear addition and one of the eastern additions. Since that time, two more additions have been created along the rear and eastern side of the home (see Exhibits 4 & 6).

Background

The structure to be moved is a one and one-half story single-family house that is approximately 1,788 square feet in size. Built in 1930 according to the Alachua County Property Appraisers office, this house typifies pre-WWII housing in the neighborhood. There is a Florida Master Site File #8AL3104 recorded with the Florida Division of Historical Resources. The FL Master Site File sites the buildings age and integrity as making it contributing to the period of significance of the neighborhood. It will remain a contributing structure to the University Heights Historic District – South once relocated.

Basis for Staff Recommendation

Relocation of historic structures is discussed in the City Of Gainesville's *Historic Preservation Rehabilitation and Design Guidelines: Relocating Buildings* (see Exhibit 1). As stated in the Guidelines:

“Relocating a building is a last resort to avoid demolition. From a preservation perspective, relocating a building has many negative consequences. First, the context of the building is lost. The association with the surrounding natural and built environment is destroyed. Left behind are sidewalks, retaining walls, and landscape features that make each building unique. Moreover, many of the character-defining features that contribute to the architectural significance of a building have to be removed or are seriously damaged as a result of relocation. These include foundations, porches, chimneys, and interior finishes, particularly plaster. Structural damage can also result. The loss of a building's historic context and many of its features conflicts with Standard 2. Despite the negatives, relocation is preferable to demolition. This is particularly true with regard to buildings whose significance is primarily architectural. There are several criteria to be considered when reviewing a proposal to move a building to a new site. They are

essentially the same as those for compatible infill. The built environment for the new site should be similar to the old one in terms of the age of the surrounding buildings, their height, materials, setback, and architectural detail. If not properly planned and executed, a relocated building can be just as incompatible as a poorly designed infill structure.”

The criteria for relocation of an historic structure is stated in Land Development Code Section 3-112(d)(6)b. The criteria are listed below with Planning staff’s responses/findings concerning each criteria shown in bold below it:

1. The historic character and aesthetic interest the building, structure or object contributes to its present setting.

The house is compatible in scale and character with the University Heights South neighborhood, which has provided University-related housing since the early twentieth century.

2. Whether there are definite plans for the area to be vacated and what the effect of those plans on the character of the surrounding areas will be.

The structure is located on a property that is part of a proposed multiple-family development to be located at 1021, 1029, and 1109 SW 3rd Ave. The proposed development is under consideration by the Historic Preservation Board in a related petition (HP-15-70).

3. Whether the building, structure or object can be moved without significant damage to its physical integrity.

Care must be taken during the moving process to ensure that the house retains those features that convey its architectural values and retain integrity of design, workmanship, and feeling. With care, the house should be able to be moved to the adjacent property without significant damage to its physical integrity.

4. Whether the proposed relocation area is compatible with the historical and architectural character of the building, structure or object.

The house under consideration for relocation would be moving onto the adjacent property to the east of its current location, thus remaining in the same neighborhood and the same historic district.

In addition, to the above criteria, issuance of a COA for relocation is also governed by the guidelines concerning demolition (LDC Sec. 30-112(d)(6)c.). Those criteria are listed below:

1. The historic or architectural significance of the building, structure, or object;

The house under consideration for relocation is a contributing structure to the historic district. Demolition of this resource would reduce the historic inventory in this neighborhood, which has a mix of historic structures and new construction that is compatible with the historic structures in the neighborhood.

2. The importance of the building, structure, or object to the ambience of a district;

The house is compatible in scale and character with the University Heights South neighborhood, which has provided University-related housing since the early twentieth century.

3. The difficulty or impossibility of reproducing such a building, structure or object because of its design, texture, material, detail, or unique location;

The house could be reproduced with a similar design, texture, materials, and details.

4. Whether the building, structure, or object is one of the last remaining examples;

The house is a frame Minimal Traditional style with wood lap siding covered in vinyl siding as the exterior fabric, so it is not one of the last remaining examples of its type.

5. Whether there are definite plans for reuse of the property if the proposed demolition is carried out, and what the effect for reuse of the property if the proposed demolition is carried out, and what the effect of those plans on the character of the surrounding area would be;

The structure is located on a property that is part of a proposed multiple-family development to be located at 1021, 1029, and 1109 SW 3rd Ave. The proposed development is under consideration by the Historic Preservation Board in a related petition (HP-15-70).

6. Whether reasonable measures can be taken to save the building, structure, or object from collapse;

The house is in good condition and is not in danger of collapse.

7. Whether the building, structure, or object is capable of earning reasonable economic return on its value.

The home is currently occupied as a rental. It is in good condition and could continue to generate revenue as a rental property.

Respectfully submitted,

Ralph Hilliard
Planning Manager
