

*The cottage under construction in the Historic Shed shop*

*The cottage shell installed on a concrete block pier foundation*

*A French door and arched gable window add extra light into the space*

*Interior framing*

*The cottage was insulated with batt insulation on the walls and spray foam on the ceiling and under the floor*

© 2015 Historic Shed

*The steep roof allowed a storage loft to be placed over the kitchen and bath area*

*The customer chose Ikea cabinets for the kitchen*

*A small corner sink fit in behind the washer/dryer closet*

*The loft is over 5' at the peak and gets light through the gable window*

*The 5' -6" x5' -6" bath has a shower, vanity and toilet, as well as a washer/dryer closet*

*A mini split AC system provides heat and cooling*

*A 2' deep storage shelf was installed opposite the loft*

*A batten door leads to the bath*

*A gas tankless heater is located on the rear of the building*
