Gainesville, FL 32601

**Re: The Cade Museum
Utility Cost Estimate**

Ms. Denault:

As discussed, we have generated this proposal for the ten bench areas to be located on the Cade project site as a part of the project. This proposal included the cost to form and pour a concrete base, place compact stone surrounding the benches, and provide and install the benches.

• Site Work (10x\$100 = \$1,000.00).....	\$	1,000.00
• Concrete Base (2x8 = 16sf/bench x 10 = 160sf x \$8 = \$1,280).....	\$	1,280.00
• Gravel (5x10 = 50sf/bench x 10 = 500sf x \$3 = \$500.00).....	\$	1,500.00
• Bench (\$1500x10 = \$15,000.00).....	\$	15,000.00

**Total cost to create bench areas, provide and install 10ea benches:
Eighteen Thousand Seven Hundred and Eighty Dollars..... \$ 18,780.00**

Please find the attached subcontractor proposals showing this information. If you have any questions or need any additional information at this time please let me know.

Sincerely,
