Education Value

	AA/AS	BA/BS	MAS
Value	0	1000	1400

SALARY

Low: Lowest salary amount

High: Highest salary amount

Range: Difference between Low and High

Linear Increments: The variable used for implementation purposes to artificially project the number of years to reach the MAX. This is for implementation/decompression purposes only.

Increment Value: The Range divided by the Linear Increments, representing the "value" of each year served.

Increment % Value: The prior value expressed as a percentage of the of Range.

PRIOR SERVICE TIME

GPD: Yes (count Max Yrs), Purchased (exact time refunded to the pension), No (no prior time, regardless of refund of contributions)

Non-GPD: Yes (count up to Max Yrs), No (no years counted)

Max Yrs: The maximum number of years used for adjusted date calculation

Penalty Yrs: For prior GPD time, a 1:1 decrease in adjusted start date, e.g. "loss equal to time gone". This is indifferent toward pension contribution refund amount.
