Overview and Basis of Accounting

Gainesville Regional Utilities Budget to Actual Comparison For the Year Ended September 30, 2019

Overview

Gainesville Regional Utilities (GRU or the Utility) is a combined municipal utility system operating electric, water, wastewater, natural gas, and telecommunications (GRUCom) systems. GRU is a utility enterprise of the City of Gainesville, Florida (City) and is reported as an enterprise fund in the comprehensive annual financial report of the City.

We offer readers this analysis of the budget to actual activities of GRU for the year ended September 30, 2019.

Basis of Accounting

GRU is required to follow the provisions in the Second Amended and Restated Utilities System Revenue Bond Resolution (Resolution) adopted by the City on September 21, 2017. GRU's electric and gas accounts are maintained substantially in accordance with the Uniform System of Accounts of the Federal Energy Regulatory Commission (FERC), as required by the Resolution, and in conformity with accounting principles generally accepted in the United States of America using the accrual basis of accounting, including the application of regulatory accounting as described in Governmental Accounting Standards Board (GASB) Statement No. 62 - *Codification of Accounting and Financial Reporting Guidance Contained in Pre-November 30, 1989 FASB and AICPA Pronouncements*.

GRU prepares its financial statements in accordance with GASB Statement No. 62, *paragraphs 476-500, Regulated Operations*, and records various regulatory assets and liabilities. For a government to report under GASB Statement No. 62, its rates must be designed to recover its costs of providing services, and the utility must be able to collect those rates from customers. If it were determined, whether due to regulatory action or competition, that these standards no longer applied, GRU could be required to expense its regulatory assets and liabilities. Management believes that GRU currently meets the criteria for continued application of GASB Statement No. 62, but will continue to evaluate significant changes in the regulatory and competitive environment to assess continuing applicability of the criteria.

The Resolution specifies the flow of funds from revenues and the requirements for the use of certain restricted and unrestricted assets. Under the Resolution, rates are designed to cover operation and maintenance expenses, rate stabilization, debt service requirements, utility plant improvement fund contributions and for any other lawful purpose. The flow of funds excludes depreciation expense and other noncash revenue and expense items. This method of rate setting results in costs being included in the determination of rates in different periods than when these costs are recognized for financial statement purposes. The effects of these differences are recognized in the determination of operating income in the period that they occur, in accordance with GRU's accounting policies.

Management's Discussion and Analysis

Gainesville Regional Utilities Budget to Actual Comparison For the Period Ended September 30, 2019

Management's Discussion and Analysis

We offer readers of GRU's Budget to Actual Comparison this management's discussion and analysis of the budget variances of GRU for the period ended September 30, 2019. It should be read in conjunction with the Budget to Actual Comparison that follows this section.

Budget Highlights

Combined Systems

- The fiscal year 2019 budget anticipated that withdrawals of \$12.2 million would be required from rate stabilization. Based on results of operations \$11.9 million was withdrawn, \$9.4 million of which was set aside for redemption of debt as a result of the 2019 Series A, B, and C transaction.

Electric System

- Total MWH sales in fiscal year 2019 were 0.2% below budget, and combined residential and non-residential revenues were 0.3% below budget.
- Fuel adjustment revenue and corresponding fuel expenses increased \$3.0 million or 3.6% due to natural gas fuel prices which were higher than forecasted, and a forced outage at the JR Kelly plant which resulted in increased fuel expenses from additional purchased power. Fuel revenue is adjusted upward through the fuel levelization balance to offset increased fuel costs. The fuel levelization balance decreased below the targeted amount so an increase to the fuel adjustment rate was made effective May 1st. Fuel revenues match fuel expenses as a pass-through to customers.
- Other electric sales are running below budget by \$3.0 million due to lower South Energy Center (SEC) related revenue as well as rental lighting coming in below budget. SEC revenue was lower than projected due to the fact that the facility is running the generation engine (7MW) instead of the turbine (4MW), based on the UF Health Campus need for capacity.
- Other revenue is under budget by \$6.3 million due in large part to the reclassification of revenue collected for the Enterprise Resource Planning (ERP) project, Total Rewards and lower revenue related to SEC chilled water and backup power. The ERP and Total Rewards revenue was moved to a regulatory liability account on the balance sheet until project implementation begins.

**Gainesville Regional Utilities
Budget to Actual Comparison
For the Period Ended September 30, 2019**

- Power production costs are less than expected because of lower contract costs related to outage events as well as lower electric expense at the SEC facility. The SEC facility is running the generation engine (7MW) instead of the turbine (4MW). The engine will be run for the foreseeable future until the UF Health campus is further developed increasing the need for additional capacity.
- In the administrative and general expense category, electric services, contractual services and building maintenance costs came in below budget. Additionally, projected impacts of the total rewards pay and compensation study were budgeted at \$420,148 in fiscal year 2019 but the project was not initiated during the fiscal year.
- Debt service is lower than budget due to the utility closing on its 2019 Series A, B and C bond issue which produced a reduction in fiscal year 2019 debt service expenditures.

Water System

- Total kGal sales of water for fiscal year 2019 were 1.0% below with residential sales revenue slightly below budget and non-residential revenue just above budget.
- Other revenue is under budget by \$1.1 million. Primary factors driving this variance are plant connection charges at \$323,000 below budget and the movement of revenue collected for the ERP project to a regulatory liability account while the project is on hold.
- Transmission and distribution expenses are lower than budgeted due to deferral of the ERP project already discussed.
- In the administrative and general expense category, electric services, contractual services and building maintenance costs came in below budget. Additionally, projected impacts of the total rewards pay and compensation study were budgeted at \$112,726 in fiscal year 2019 but the project was not initiated during the fiscal year.
- Debt service is lower than budget due to the utility closing on its 2019 Series A, B and C bond issue which produced a reduction in fiscal year 2019 debt service expenditures.

Gainesville Regional Utilities Budget to Actual Comparison For the Period Ended September 30, 2019

Wastewater System

- Total kGals billed during fiscal year 2019 were at 0.5% below budget with total residential and non-residential revenues at 0.4% below budget.
- Other revenue is under budget by \$100,000 due to the movement of revenue collected for the ERP project to a regulatory liability account while the project is on hold offset by lower than planned WW connection charges.
- On a combined basis, collection and treatment costs were \$1,621,017 or 9.3% below budget, in part due to deferral of the ERP project.
- In the administrative and general expense category, electric services, contractual services and building maintenance costs came in below budget. Additionally, projected impacts of the total rewards pay and compensation study were budgeted at \$134,549 in fiscal year 2019 but the project was not initiated during the fiscal year.
- Debt service is lower than budget due to the utility closing on its 2019 Series A, B and C bond issue which produced a reduction in fiscal year 2019 debt service expenditures.

Gas System

- Retail therm sales were 6.3% below budget, primarily due to a mild winter locally. Residential and non-residential revenues came in at 2.9% below budget.
- Gas fuel adjustment revenues and purchased gas expense were 3.3% below budget for fiscal year 2019.
- Other revenue is down due to lower turn-on fee revenue as well as the movement of revenue collected for the ERP project to a regulatory liability account while the project is on hold.
- Operation and maintenance expense are lower due to deferred ERP related costs already discussed.
- In the administrative and general expense category, vehicle and transportation expenses, electric services and contractual services came in below budget. Additionally, projected impacts of the total rewards pay and compensation study were budgeted at \$45,050 in fiscal year 2019 but the project was not initiated during the fiscal year.

**Gainesville Regional Utilities
Budget to Actual Comparison
For the Period Ended September 30, 2019**

- Debt service is lower than budget due to the utility closing on its 2019 Series A, B and C bond issue which produced a reduction in fiscal year 2019 debt service expenditures.

Telecommunications System

- Total telecommunication sales of services are slightly down by 0.2% due to trunking radio revenue coming in 2.7% below projections.
- Operation and maintenance expenses are higher due to greater shared service overheads allocated to the system than budgeted. Also as with the other systems expenses are lower due to deferred ERP related costs already discussed.
- Administrative and general expenses are below budget due to lower shared service overheads than budgeted. Additionally, projected impacts of the total rewards pay and compensation study were budgeted at \$36,526 in fiscal year 2019 but the project was not initiated during the fiscal year.
- Debt service is lower than budget due to the utility closing on its 2019 Series A, B and C bond issue which produced a reduction in fiscal year 2019 debt service expenditures.
