

Utility Bill Assistance

Morgan Spicer and Zeriah K. Folston, MPA
Policy Research Team
Office of the City Clerk

Policy Research Process

Phase 1:

Research & Idea Formulation

Commission & Policy Staff research & refine ideas.

Phase 2: GPC Consideration

Commissioner presents research and idea for discussion at GPC.

Item further refined by GPC. If Committee wishes to proceed, item assigned to appropriate charter officer.

Utility Bill Assistance

- Existing GRU Programs
- Existing Federal and Statewide Programs
- Funding and Administration of Assistance Programs
- Example Municipal Programs
 - LIFT-UP St. Petersburg, Florida
 - Weatherization Programs Knoxville, Tennessee
 - Discount Programs Seattle, Washington; Austin, Texas;
 Columbus, Ohio

Existing GRU Programs

- Automatic Payment Extension Program
- GRU Project Share, where voluntary donations from customers and employees go to assist the elderly and handicapped in paying their bills.
- GRU Low-Income Energy Efficiency Program Plus, which assists low income customers with home improvements to lower their electric bills
- GRU Energy audit options, such as the Home Energy Advisor Tool, to help identify possible savings.
- Personal Hardship Extensions and Extend-A-Hand installment payments.
- GRU also advertises community agencies, such as Catholic Charities, Community Action Agency, Florida Coalition for the Homeless, Gainesville Community Ministry, and Salvation Army, who offer assistance

Data on GRU Customers Referred to Collections in 2020

Month	# of Active Accounts	# of Accounts	Referred	% Referred	Amount Referred
January	79539		226	0.3%	104,529.90
February	79255		240	0.3%	101,958.76
March	84832		266	0.3%	135,530.00
April	82892		251	0.3%	100,526.24
May	79870		200	0.3%	83,143.60
June	80885		162	0.2%	60,121.54
July	79689		208	0.3%	102,069.46
August	79405		204	0.3%	86,493.62
September	83620		440	0.5%	207,526.94
October	85777		385	0.4%	200,489.18
November	72544		308	0.4%	342,281.88
December	84182		364	0.4%	260,968.50
Totals	972490		3254	0.3%	1,785,639.62

Federal and Statewide Programs

- The Home Energy Assistance Program, which assist low income individuals with their heating and medically necessary cooling bills.
- The Weatherization Assistance Program provides grants for projects such as attic
 and floor insulation or ventilation, applying solar reflective coatings, installing solar
 screens, and repairing or replacing inefficient heating and cooling units.
- The Elderly Home Energy Assistance Program assists low income households with elderly individuals when the household is experiencing a home energy emergency and is unable to pay their utility bill.

Funding and Administering Utility Assistance Programs

- Options to be explored:
 - Allocate money directly from the General Fund to be distributed to a third party agency or organization that would then administer a utility bill assistance program.
 - Allocate a percentage of the utility tax to be distributed to a third party agency or organization that would then administer a utility bill assistance program.
 - Allocate money from the American Rescue Plan funds to be distributed to a third party agency or organization that would then administer a utility bill assistance program.
- If these strategies are taken, the City could develop a policy that would outline the criteria that applicants must meet to receive assistance, in addition to the criteria the third party organization administering the funds would have to meet. Further analysis needs to be done by the appropriate Charter(s).

Examples

- LIFT-UP, St. Petersburg, Florida
- Knoxville, Tennessee Weatherization
- Discount Programs
 - Seattle, Washington
 - Austin, Texas
 - Columbus, Ohio

LIFT-UP

- The National League of Cities established the program LIFT-UP for families who are unable to pay their utility bills. The program connects residents to financial empowerment services, and helps cities avoid the costs of using debt collectors or imposing repeated service shut offs.
- The program began in five pilot cities and results showed that cities were better able to collect utility payments with less reliance on debt collection or resorting to shutting off services.
- In St. Petersburg, the program enrolled 100 participants, who were connected to a financial counselor to develop a customized payment plan, and the participants saw a significant reduction in the average number of shut-offs compared to the control group.

Weatherization Programs, Knoxville, Tennessee

- Knoxville partnered with groups including the Knoxville Utilities Board, the
 Tennessee Valley Authority, the Knoxville-Knox County Community Action
 Committee, and the Alliance to Save Energy to assist 1,500 low income households
 from 2016-2018 to become more energy efficient.
- The city, funded by a \$15 million grant from the TVA, refurbished homes with better heating and air units and insulation, and helped educate participants on how to maximize savings.
- The programs are expected to save 6 million kilowatts annually, and participants reported saving \$500 annually on their utility bills.

Discount Programs

Seattle, Washington

• In Seattle, the City offers a discount program if your household income is at or below 70% of the state's median income. If eligible, you can receive a discount of 60% on your light bill, and 50% on your public utilities bill.

Austin, Texas

 Austin offers a Customer Assistance Program, which offers a utility bill discount to customers on low or fixed incomes who participate in certain assistance programs. CAP Discounts can reduce utility bills an average of \$650 a year, and individuals can also receive discounts on electric services, water services, drainage fees, and more.

• Columbus, Ohio

 Columbus offers a low income discount program, where eligible participants can receive 20% off water and sewer usage charges. Income qualified persons 60+ can also qualify for a 10% discount on electric and water bills.

Policy Research Process

Phase 3:

Timeline Development Charter officer
determines
time/resources
required to evaluate
proposal and creates
community
engagement plan.

Item returns to GPC for approval of Charter's timeline and plan.

Phase 4:

Full Staff Analysis and Proposal Development

Charter officer and staff assess GPC directive for impacts (operational, fiscal, etc) and requirements.

Charter officer and staff conduct community engagement.

Phase 5:

Proposal Returns to City Commission Meeting Charter staff present final operations recommendations to full Commission, including impacts and results of community engagement.

City Commission decides whether to augment, implement, table, or archive the proposal.

Phase 6: Implementation

Policy implemented and metrics gathered for KPIs

Discussion?
