NOTE: This Addendum has been issued only to the holders of record of the specifications and to the attendees of the mandatory pre-bid conference held on May 26, 2021.

The original Specifications remain in full force and effect except as revised by the following changes which shall take precedence over anything to the contrary:

1. Any questions shall be submitted in writing to the City of Gainesville Purchasing Division by 5:00 p.m. (local time), June 2, 2021.

Questions may be submitted as follows:

Email: [mcphalldt@cityofgainesville.org](mailto:mcphalldt@cityofgainesville.org)

2. Please find attached:

3. Darius McPhall, Purchasing Division, discussed bid requirements.

- a. We only accept electronic submittals.

- c. Send questions in writing to Darius McPhall via email.
  - i. All communication through Darius McPhall or purchasing staff only. Do not communicate with other City staff.
  - ii. Question deadline June 2, 2021 at 5 p.m.
- d. Black out Period

4. Betsy Waite, Wild Spaces & Public Places Director/Project Manager, introduced herself and the rest of the City staff. She encouraged contractors to walk the property to familiarize themselves with the existing access points and layout of the nature park.

The following are answers/clarifications to questions received at the mandatory pre-bid conference:

5. Question: Are the 2698 NW 12<sup>th</sup> Ave. and the NW 16<sup>th</sup> Avenue entrance the only access points of the site?  
Answer: These are the two main access points. The contractor could also elect to utilize NW 8<sup>th</sup> Avenue, but they would have to apply through the City's Public Works Department for an Obstruction of Right of Way permit for roadway impacts. There is no curb cut on NW 8<sup>th</sup> Avenue.
6. Question: Where is the construction staging site located?  
Answer: There is a relatively clear area just north of the northern limits of the boardwalk that can be utilized for construction staging and laydown. Per page 5 of the bid manual, any damage to the road, trail, gates, etc. shall be repaired promptly by the Bidder. All expenses in restoring the area to the original condition will be the responsibility of the Bidder.
7. Question: Is the City open to material price escalation?  
Answer: No. See page 7 of the bid manual. No escalation is permitted, pricing shall remain firm through project duration.
8. Question: Please explain owner direct purchasing.  
Answer: The City will execute an owner direct purchase for the composite WearDeck™ material. The Bidder *shall* include the price of the WearDeck™ material in their bid, but the Bidder *shall not* include tax for this purchase. After execution of the agreement (with the low responsive, responsible bidder), the City will execute a deductive change order with the Bidder for the WearDeck™ material cost. The WearDeck™ material is the only owner direct purchase that is anticipated on this project.
9. Question: Provide a definition of the "cleaning" for the handrails.  
Answer: The contractor shall remove mildew, dirt, pollen, etc. from the existing handrails with a product such as Windex or equal.
10. Question: The area just north of the boardwalk is relatively open, can we park equipment here?  
Answer: Yes, the area just north of the northern limits of the boardwalk can be used for contractor staging. Please note that while the boardwalk is closed to the public during construction the rest of the nature park will remain open. The contractor must provide pedestrian maintenance of traffic to minimize conflicts between the work zone and the active, open trail network.
11. Question: Do we have to provide construction signage?  
Answer: Yes. The jobsite must comply with the OSHA and ANSI construction safety signage standards.
12. Question: Can the wire mesh be reused if not damaged.  
Answer: Yes. See page 5 of the bid manual. Existing black coated wire may be reused if it can be salvaged without damage. If the Bidder prefers to replace the black coated wire they must use 12.5 gauge HDG 2"X 4" welded wire core, primed, then coated wire.
13. Question: The plans show a single joist, but the existing joist is double.  
Answer: Revisions have been made to Sheets S-2 and A101 – See attached.

14. Question: What permits are the contractor responsible?

Answer: See page 8 of the bid manual: A Building Permit from the City's Department of Sustainable Development will be applied for (and paid for) by the City of Gainesville in advance of the start of construction. This permit will be transferred to the contractor after execution of the contract. The contractor must be licensed by the State of Florida as a construction contractor and have an active Building or General Contractor's License. The contractor must be registered with the City of Gainesville Department of Sustainable Development and have up-to-date insurance on file.

See page 5 of the bid manual: If the Bidder chooses to use NW 8th Avenue or NW 16th Avenue for site access and if travel is going to be disturbed for any period of time, then MOT will be required, including lane closure next to the sidewalk and adequate signage at both access points prior to the beginning of construction. The Bidder must submit and pay for associated permits.

And see page 7 of the bid manual: The Bidder shall develop and implement a stormwater pollution prevention plan (SWPPP) for all work performed under this Scope of Work. This SWPPP shall address preventing sediment from leaving the Bidder's work zones, protection of all water conveyance systems, tree protection, and the cleaning of trucks exiting the work zones. The Bidder shall inspect all installed protection measures at least weekly and after any 24-hour period which accumulates 0.5 inches of rain or more. An inspection report shall be submitted to the City's Project Manager within 24 hours of each inspection. Bidder shall coordinate with the City's Public Works Department.

15. Question: What is the budget for this project?

Answer: The engineer's estimate for this project is \$346,439.50

16. Question: Is the contractor financially responsible for the permits submitted by the City?

Answer: See answer to question 14, above.

17. Question: Do we have a Geotech report?

Answer: No.

18. Question: Where specifically are the beams being replaced?

Answer: See page 2 of the bid manual.

19. Question: What is the weight limit of the current decking?

Answer: A gross vehicle weight limit has not been calculated for this project.

20. Question: Will Longshoreman's insurance will be required for this project?

Answer: No. Longshoreman's insurance is not required for this project. Please see Article 6 of the Standard General Conditions of the Construction Contract for the minimum insurance coverages required for this project.
