

Gainesville Police Department Crowd Management July 2021

Crowd Management Solutions

1. Adopt a revised noise ordinance for vehicles traveling on the city of Gainesville roadways that is consistent with the current city of Gainesville Noise ordinance.
 - Where the crowds gather, individuals circle through neighborhoods with loud stereos in their vehicles creating a disturbance.
2. Develop a Hookah Lounge ordinance to determine the use of their facilities which is consistent and fair.
 - Several are operating as after-hours nightclubs causing crowd issues.

Business Accountability

1. Consider developing and adopting an ordinance which addresses businesses who are responsible for multiple calls for service that require many police units to respond to deal with any sort of situation to include large crowds gathering on unattended property.
 - Daytona Beach City Ordinance
 - Business/Property Owners are fined for repeated calls for service which pull Officers away from the rest of the City.
 - Tailor the ordinance to fit the needs of our community.
