Economic Impact Analysis Program (EIAP) Data Platform

Welcome to UF/IFAS EIAP Data Platform!

We provide data about the agriculture, food, forestry, and marine sectors in Florida within an interactive, easy-to-navigate platform.

This site provides the most recent data and information on the agriculture, food, forestry, and marine sectors in Florida. We aim to increase awareness of the existence, size, and importance of these sectors within the state, and to assist industry stakeholders and policy makers with informed decision-making so they can better serve the communities that are dependent on these sectors. There are individual pages dedicated to particular components of these sectors, including

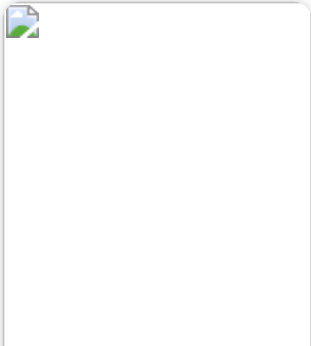

18 page for data query.

HOME AGRICULTURAL LABOR CROP PRODUCTION ECONOMIC CONTRIBUTIONS COVID-19 TRENDS

g the COVID-19 pandemic, this site will also provide a "COVID-19 Trends" tab, which displays a set of COVID-19 related public health metrics, to inform decision-making related to the safe resumption or continuation of activities related to agriculture, natural resources, and related educational opportunities that might involve small groups or social gatherings.
