Acceptance and Release of Easements for Drainage System in the 100 block of SW 23rd Street

The City obtained a public utilities easement along the rear lot lines of several parcels located on the west side of SW 23rd Street. A drainage system was installed, however, it was not all contained within the easement limits. The Public Works Department obtained new easements to cover the actual location of the drainage system. The "old" easement can now be released.

None.

The City Commission: 1) accept the two easements for the drainage system; 2) authorize the Mayor and the Clerk of the Commission to sign the release of easement; and 3) direct the Clerk to record all documents in the Public Records of Alachua County, subject to approval of the City Attorney as to form and legality.
