Referral of Development of a Transportation Improvement Priority Plan (B)

This item involves a request to hear from staff relating to a proposed development of a transportation improvement priority plan.

In November 2007, staff presented to the Recreation, Cultural Affairs and Public Works Committee a preliminary list of needed transportation projects and the proposed approach to prioritize such projects. Criteria have been developed to select projects for implementation with funds from the additional local option fuel tax revenue.

There is no fiscal impact associated with the development of a plan.

Recommended Motion: The Recreation, Cultural Affairs and Public Works Committee approve the prioritization criteria.
