

Legislation Details

File #: 060399. **Version:** 0 **Name:** All Source Solicitation for Energy Supply (B)
Type: Discussion Item **Status:** Held In Commission
File created: 8/28/2006 **In control:** General Manager for Utilities
On agenda: **Final action:**
Title: All Source Solicitation for Energy Supply (B)

Independent reviews of the proposed Integrated Resource Plan were performed last winter and were concluded in March of 2006. One of the conclusions reached was that additional generation capacity would be needed even if the maximum cost-effective energy conservation were achieved. On April 12, 2006, in addition to developing a plan to achieve the maximum cost-effective energy conservation, the City Commission requested staff to conduct an all source solicitation to meet the balance of Gainesville's energy and demand needs. The results of the all source solicitation were to be compared to the options of a self built, biomass fired or an integrated gasification combined cycle (IGCC) facility (preferably able to use biomass as well). Staff has identified a number of opportunities and has designed a process to assemble an energy supply plan to meet the Community's need for efficient, clean, economical, reliable and low carbon intensity sources of electrical supply.
