Members of the Depot Use Team - Depot Building (B)

On June 12, 2000, the City Commission authorized the creation of a Depot Use Team to advise on the uses of the Gainesville depot building in coordination with the rehabilitation of the structure. The eleven-member Depot Use Team will be a coordinating committee of members from established City boards and neighborhood groups. The proposed charge of the coordinating committee is to: arrive at agreement and make recommendations on the space uses; assess and prioritize program needs; and coordinate user needs with the planned redevelopment.

The depot is a resource of citywide importance, and has limited space that should be used resourcefully. Groups and organizations seeking to use the shared space would be encouraged to consult on the design of these areas. Users of the depot may change at the various phases of the stormwater park's development, and flexibility will increase potential occupants at all phases of the redevelopment.

Staff liaisons will be appointed to the board for providing technical support.

None

Appoint members to the Depot Use Team.
